BACKSTORY

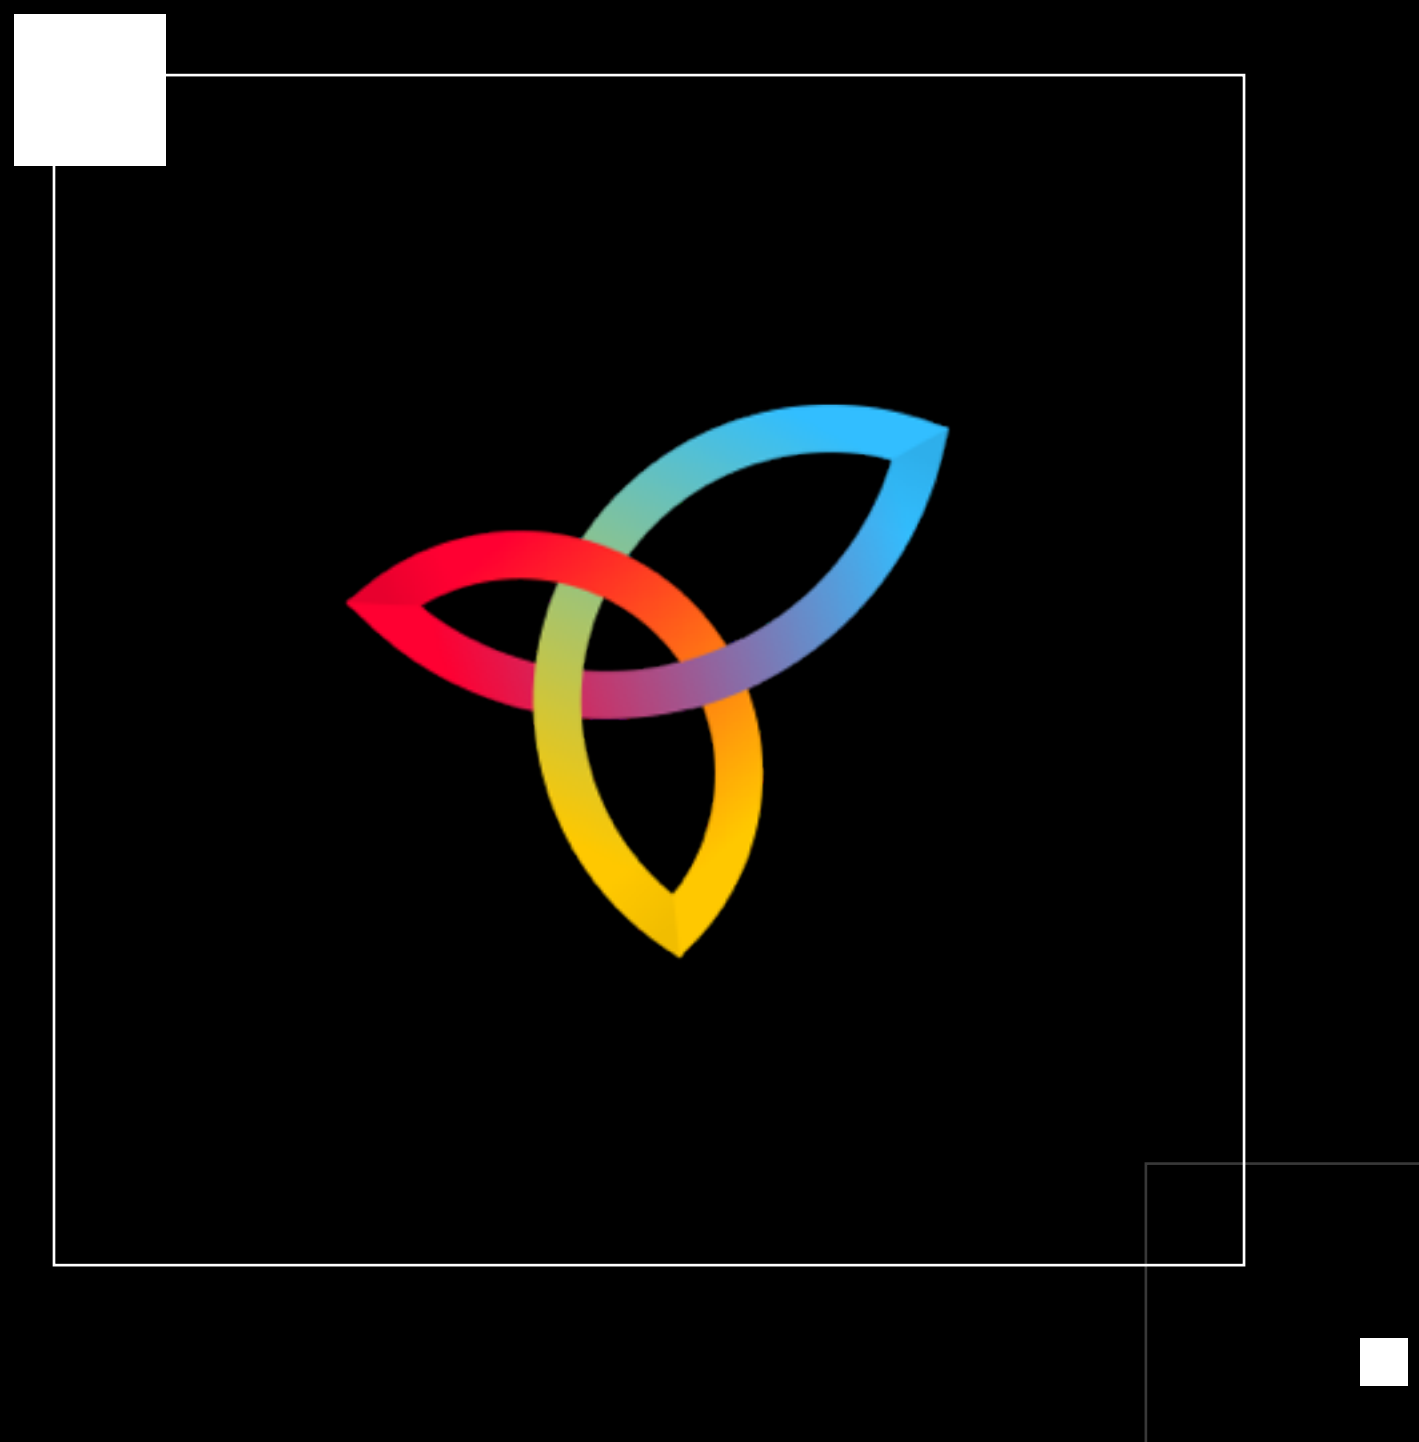

Begin at the beginning and go
on till you come to the end;
then stop.

- Mad Hatter -

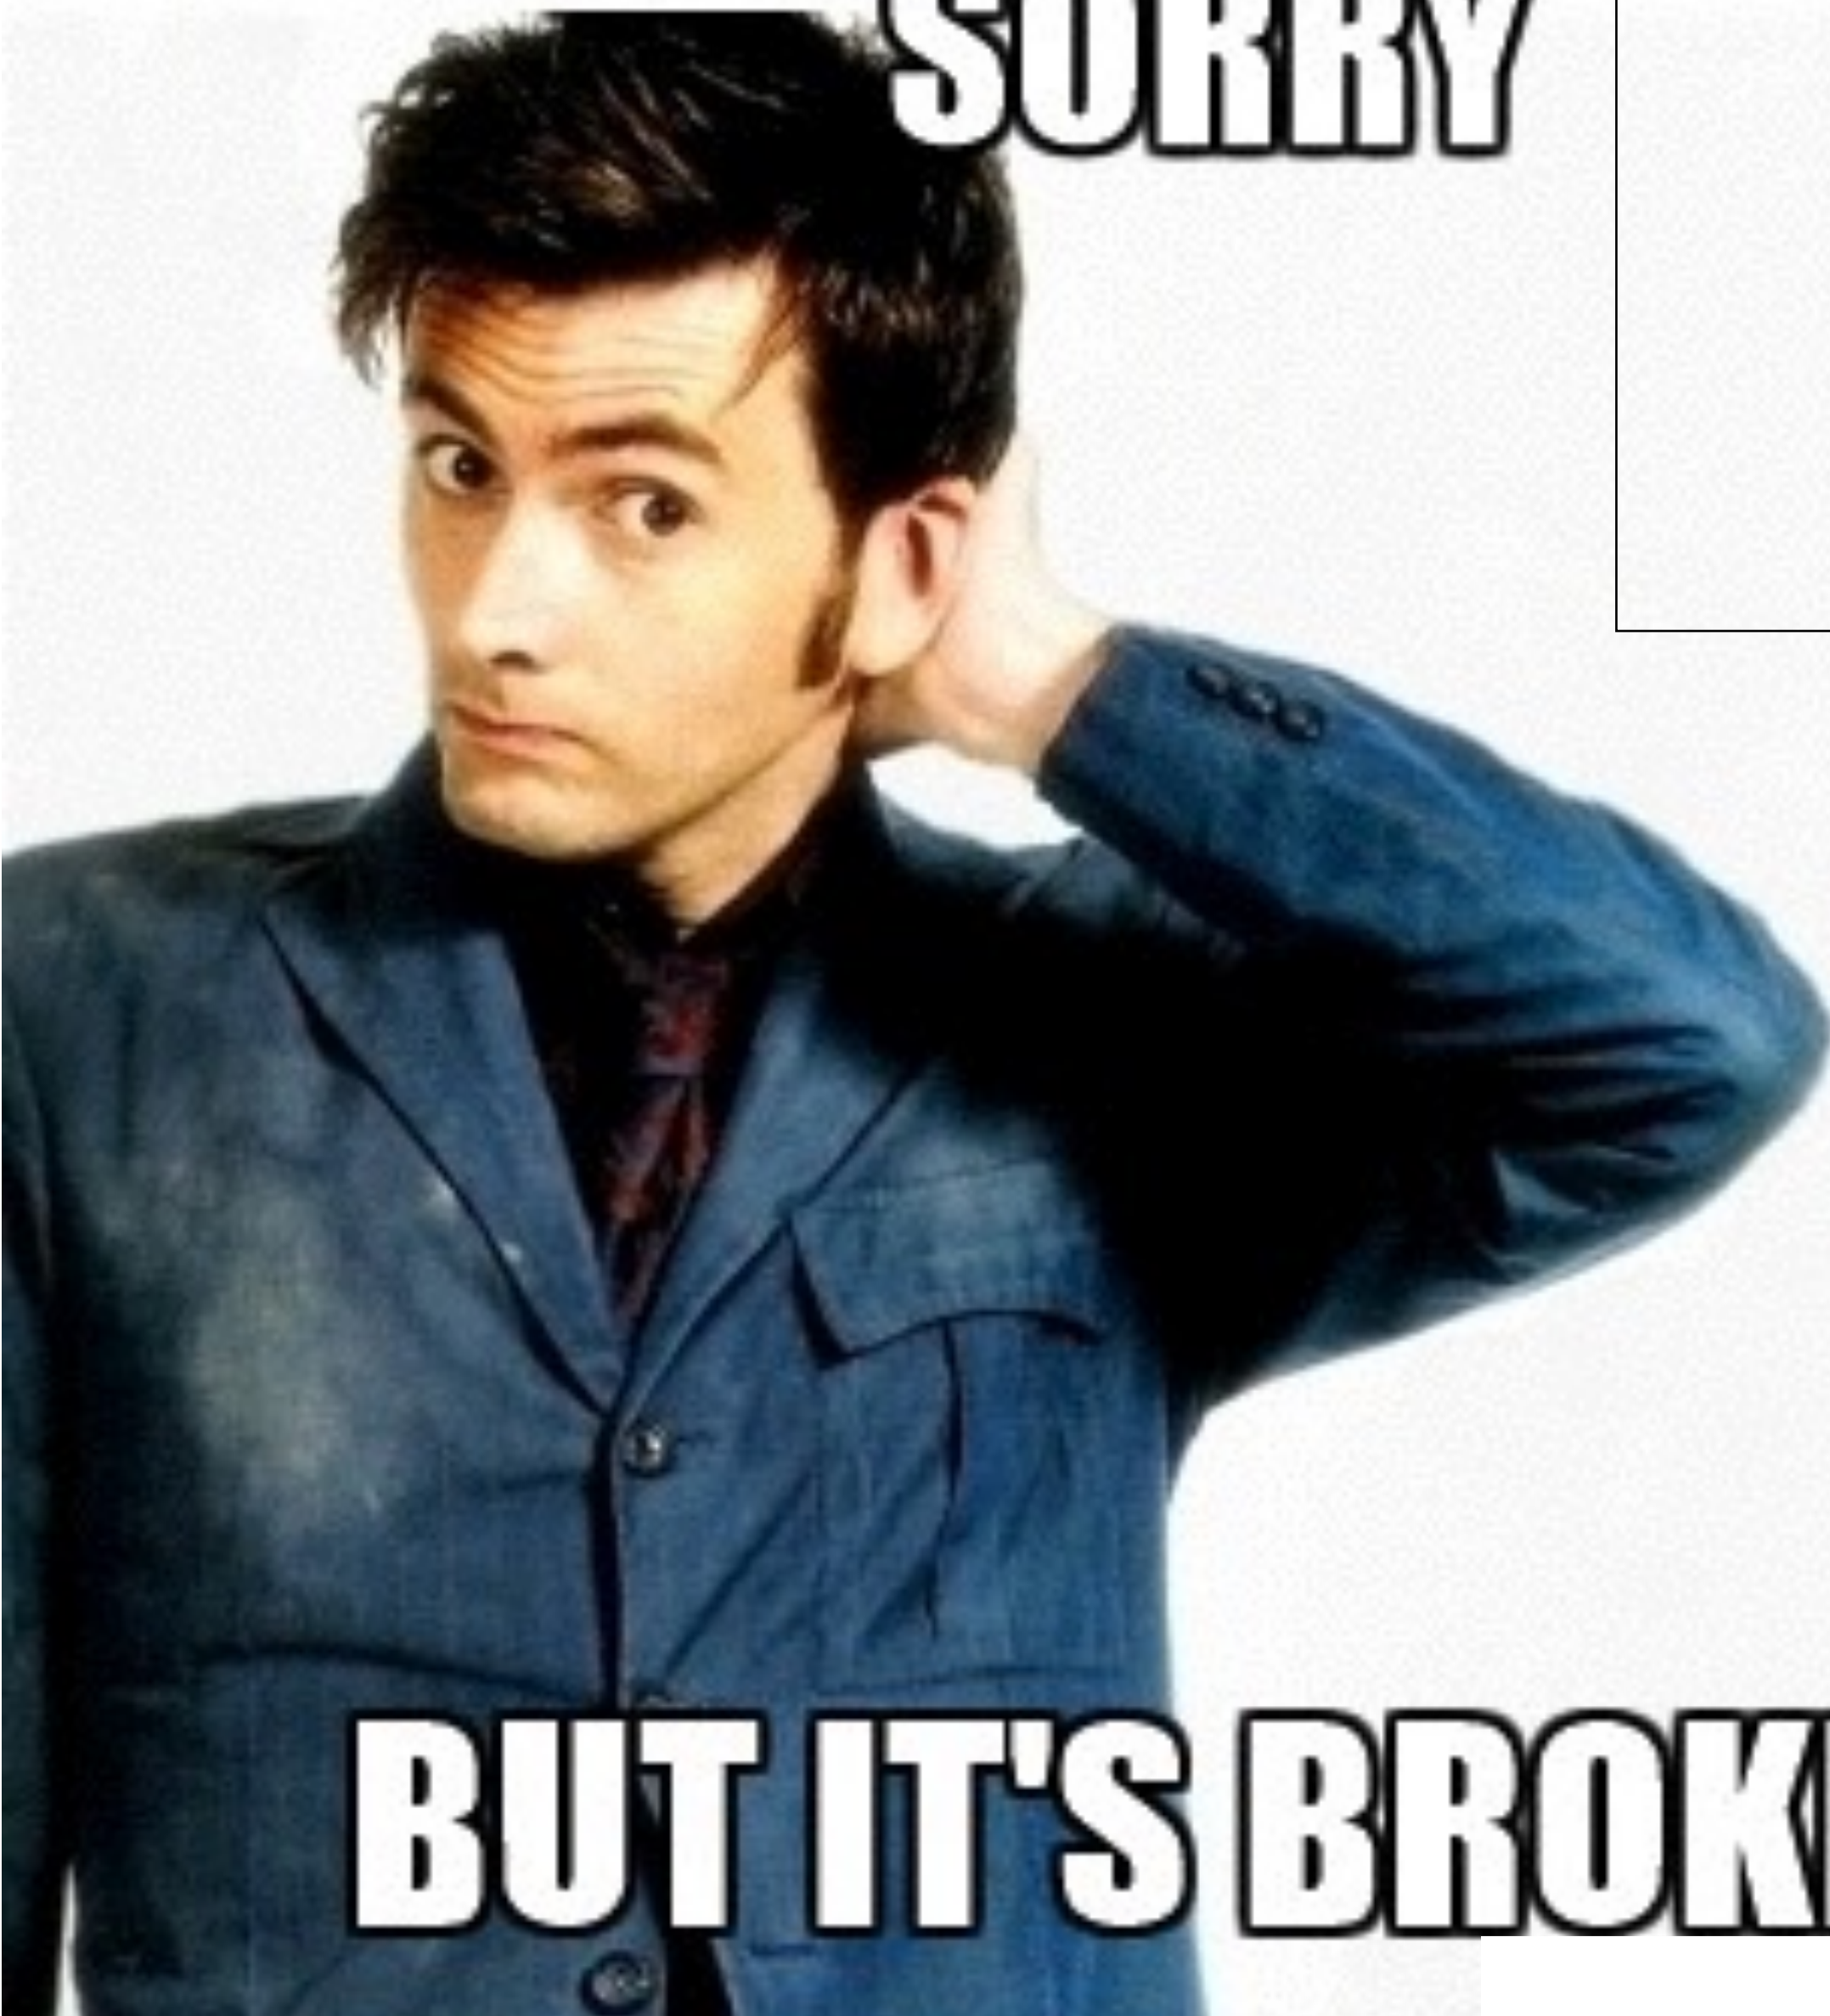

I LOVE BRIGHT, SHINY THINGS

But Thats Not Always
Enough

**I'M SORRY. I'M SO
SORRY**

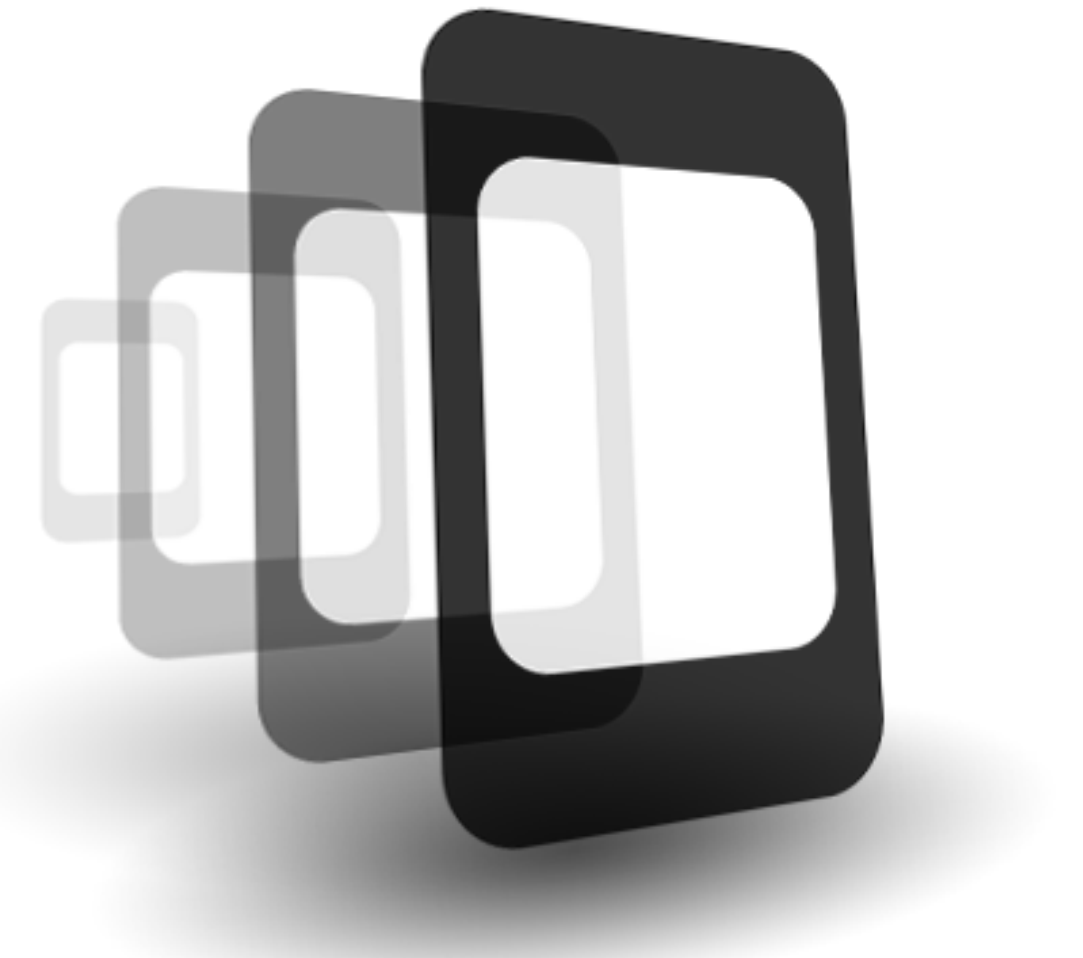

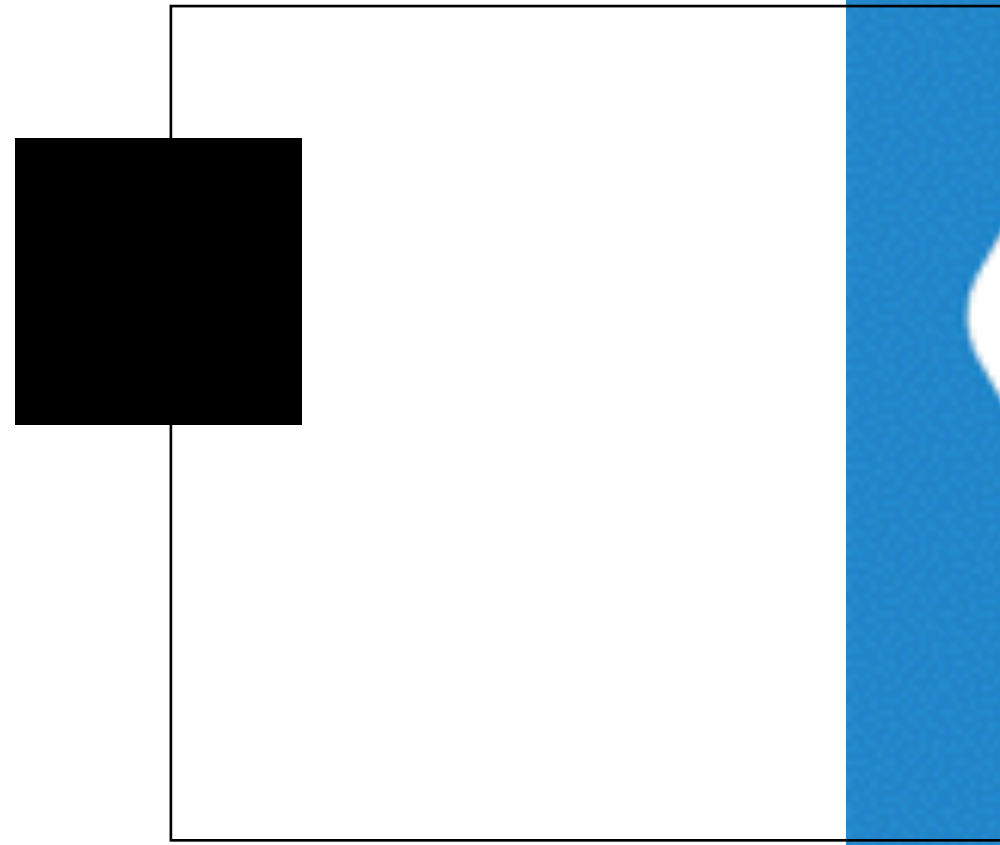

BUT IT'S BROKEN

CROSS PLATFORM

Mobile Development has been broken for a while.

You want to support everyone, but its a nightmare for developers, designers, and business

Phone**Gap**

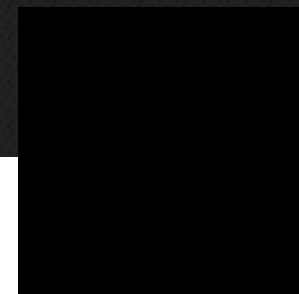

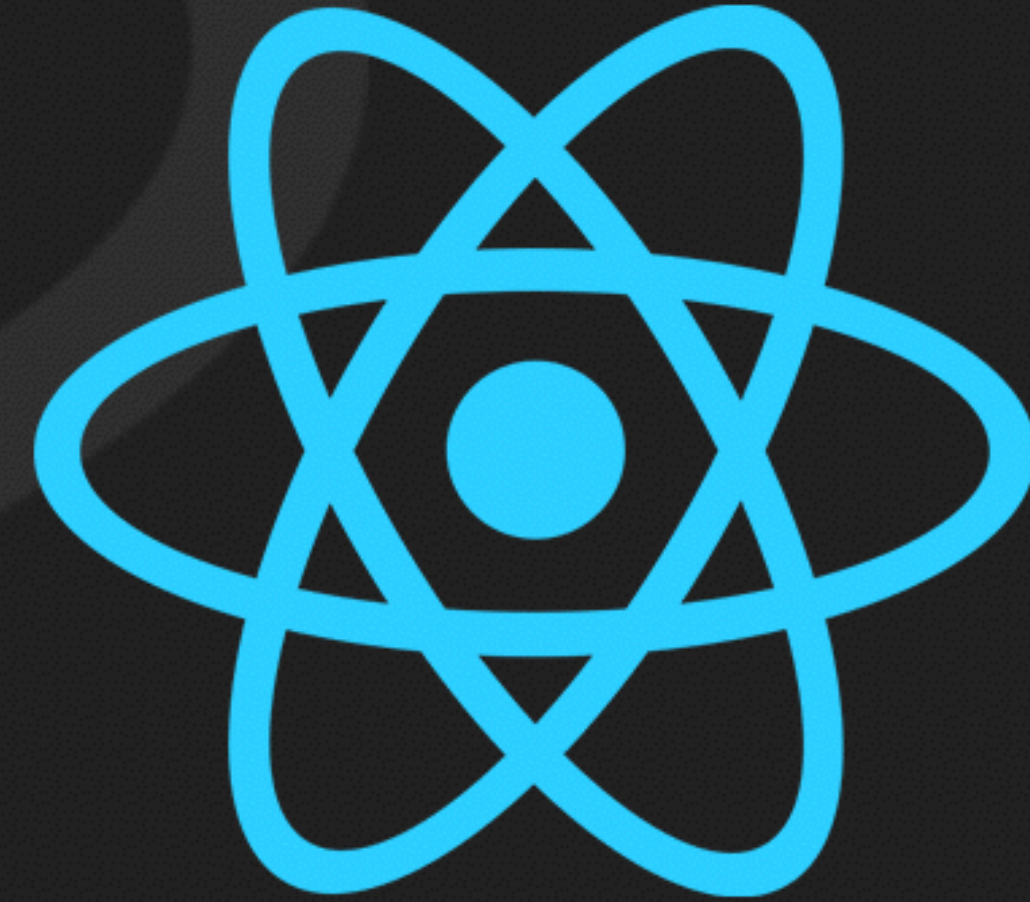

OTHER

OPTIONS

React Native

React Native enables you to build world-class application experiences on native platforms using a consistent developer experience based on JavaScript and React. The focus of React Native is on developer efficiency across all the platforms you care about – learn once, write anywhere. Facebook uses React Native in multiple production apps and will continue investing in React Native.

DEVELOPMENT SPEED

Faster, Faster, until the thrill of
speed overcomes the fear of
death

- Hunter S. Thompson -

ES6

ES6

is a significant update to the language, and the first update to the language since ES5 was standardized in 2009.

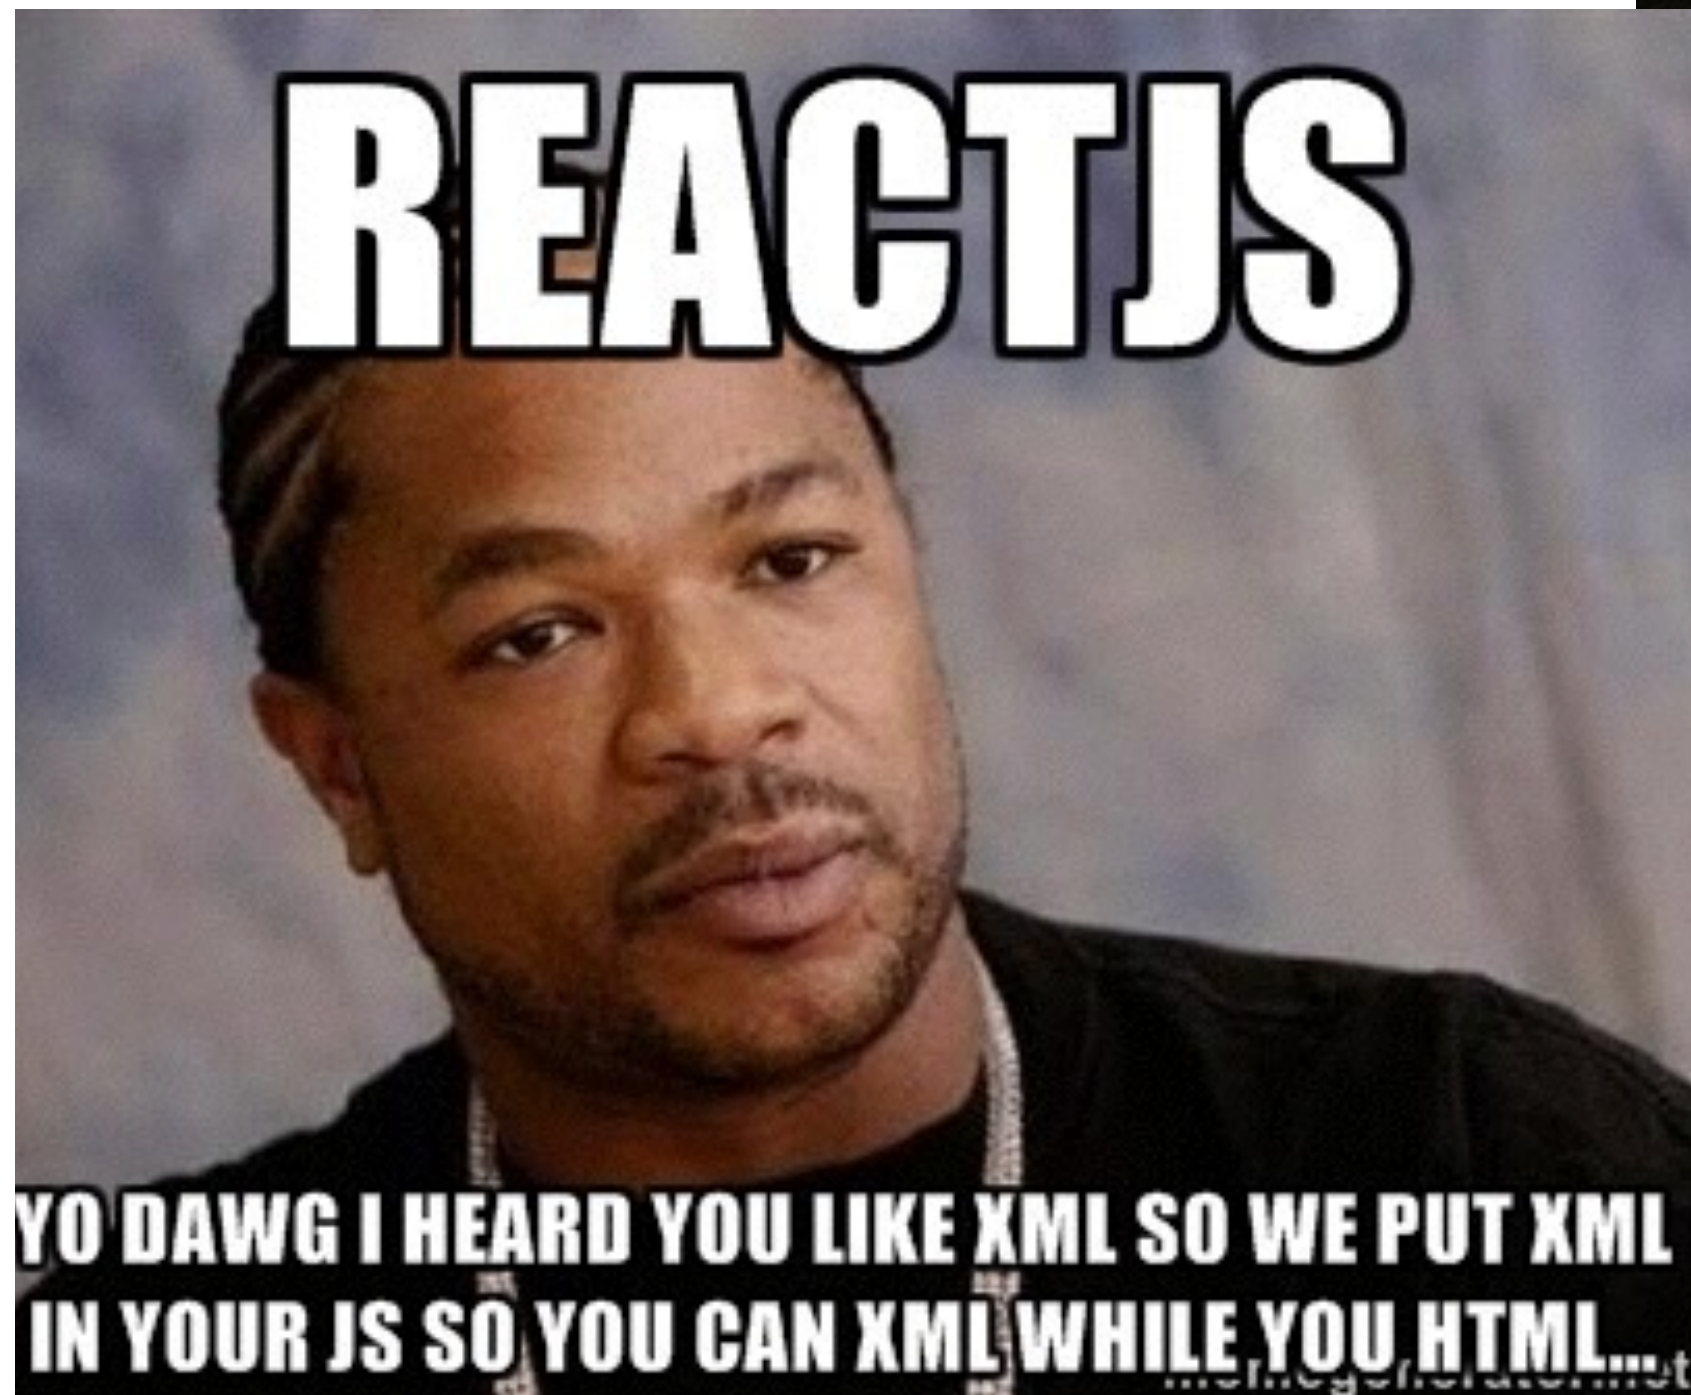

Add both useful features and syntactic sugar.

- `const / let`
- `() => {}`
- ``${obj.name} - 1``
- `{...obj}`
- `const { prop } = obj`
- `class Foo extends`
- `import / export`

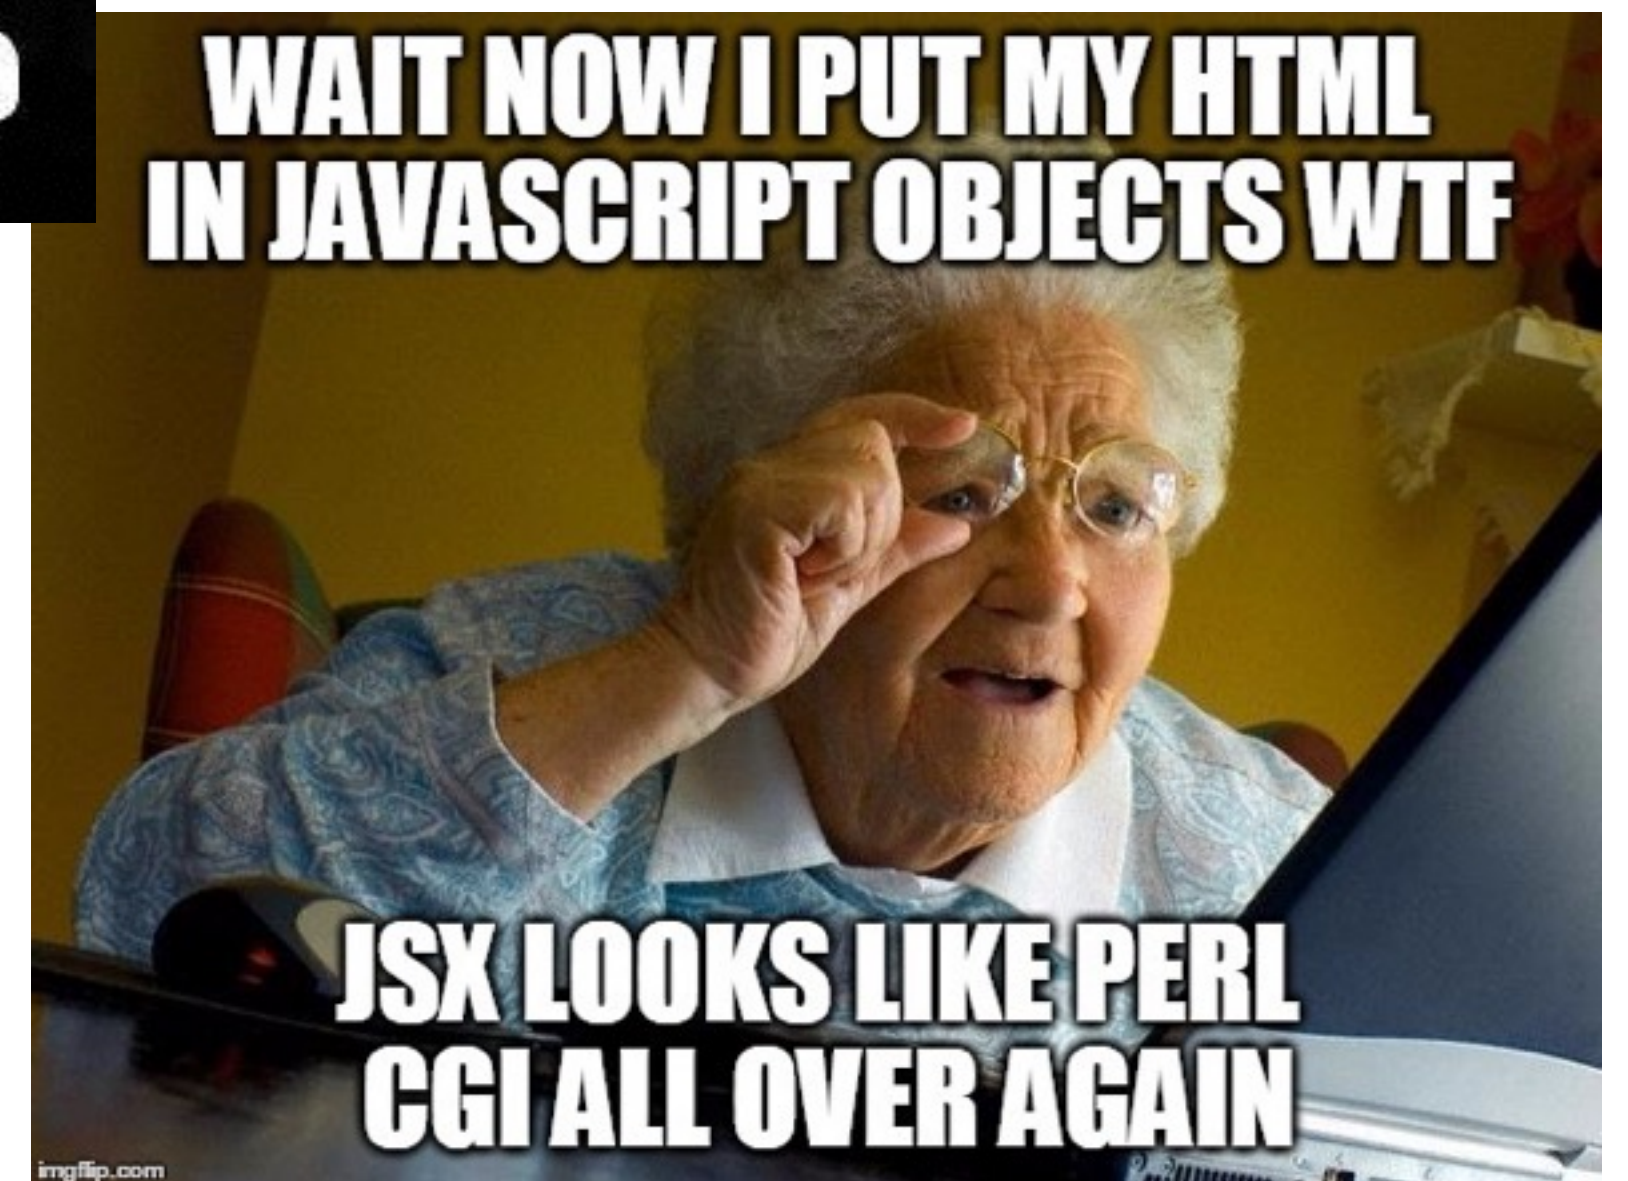

JSX

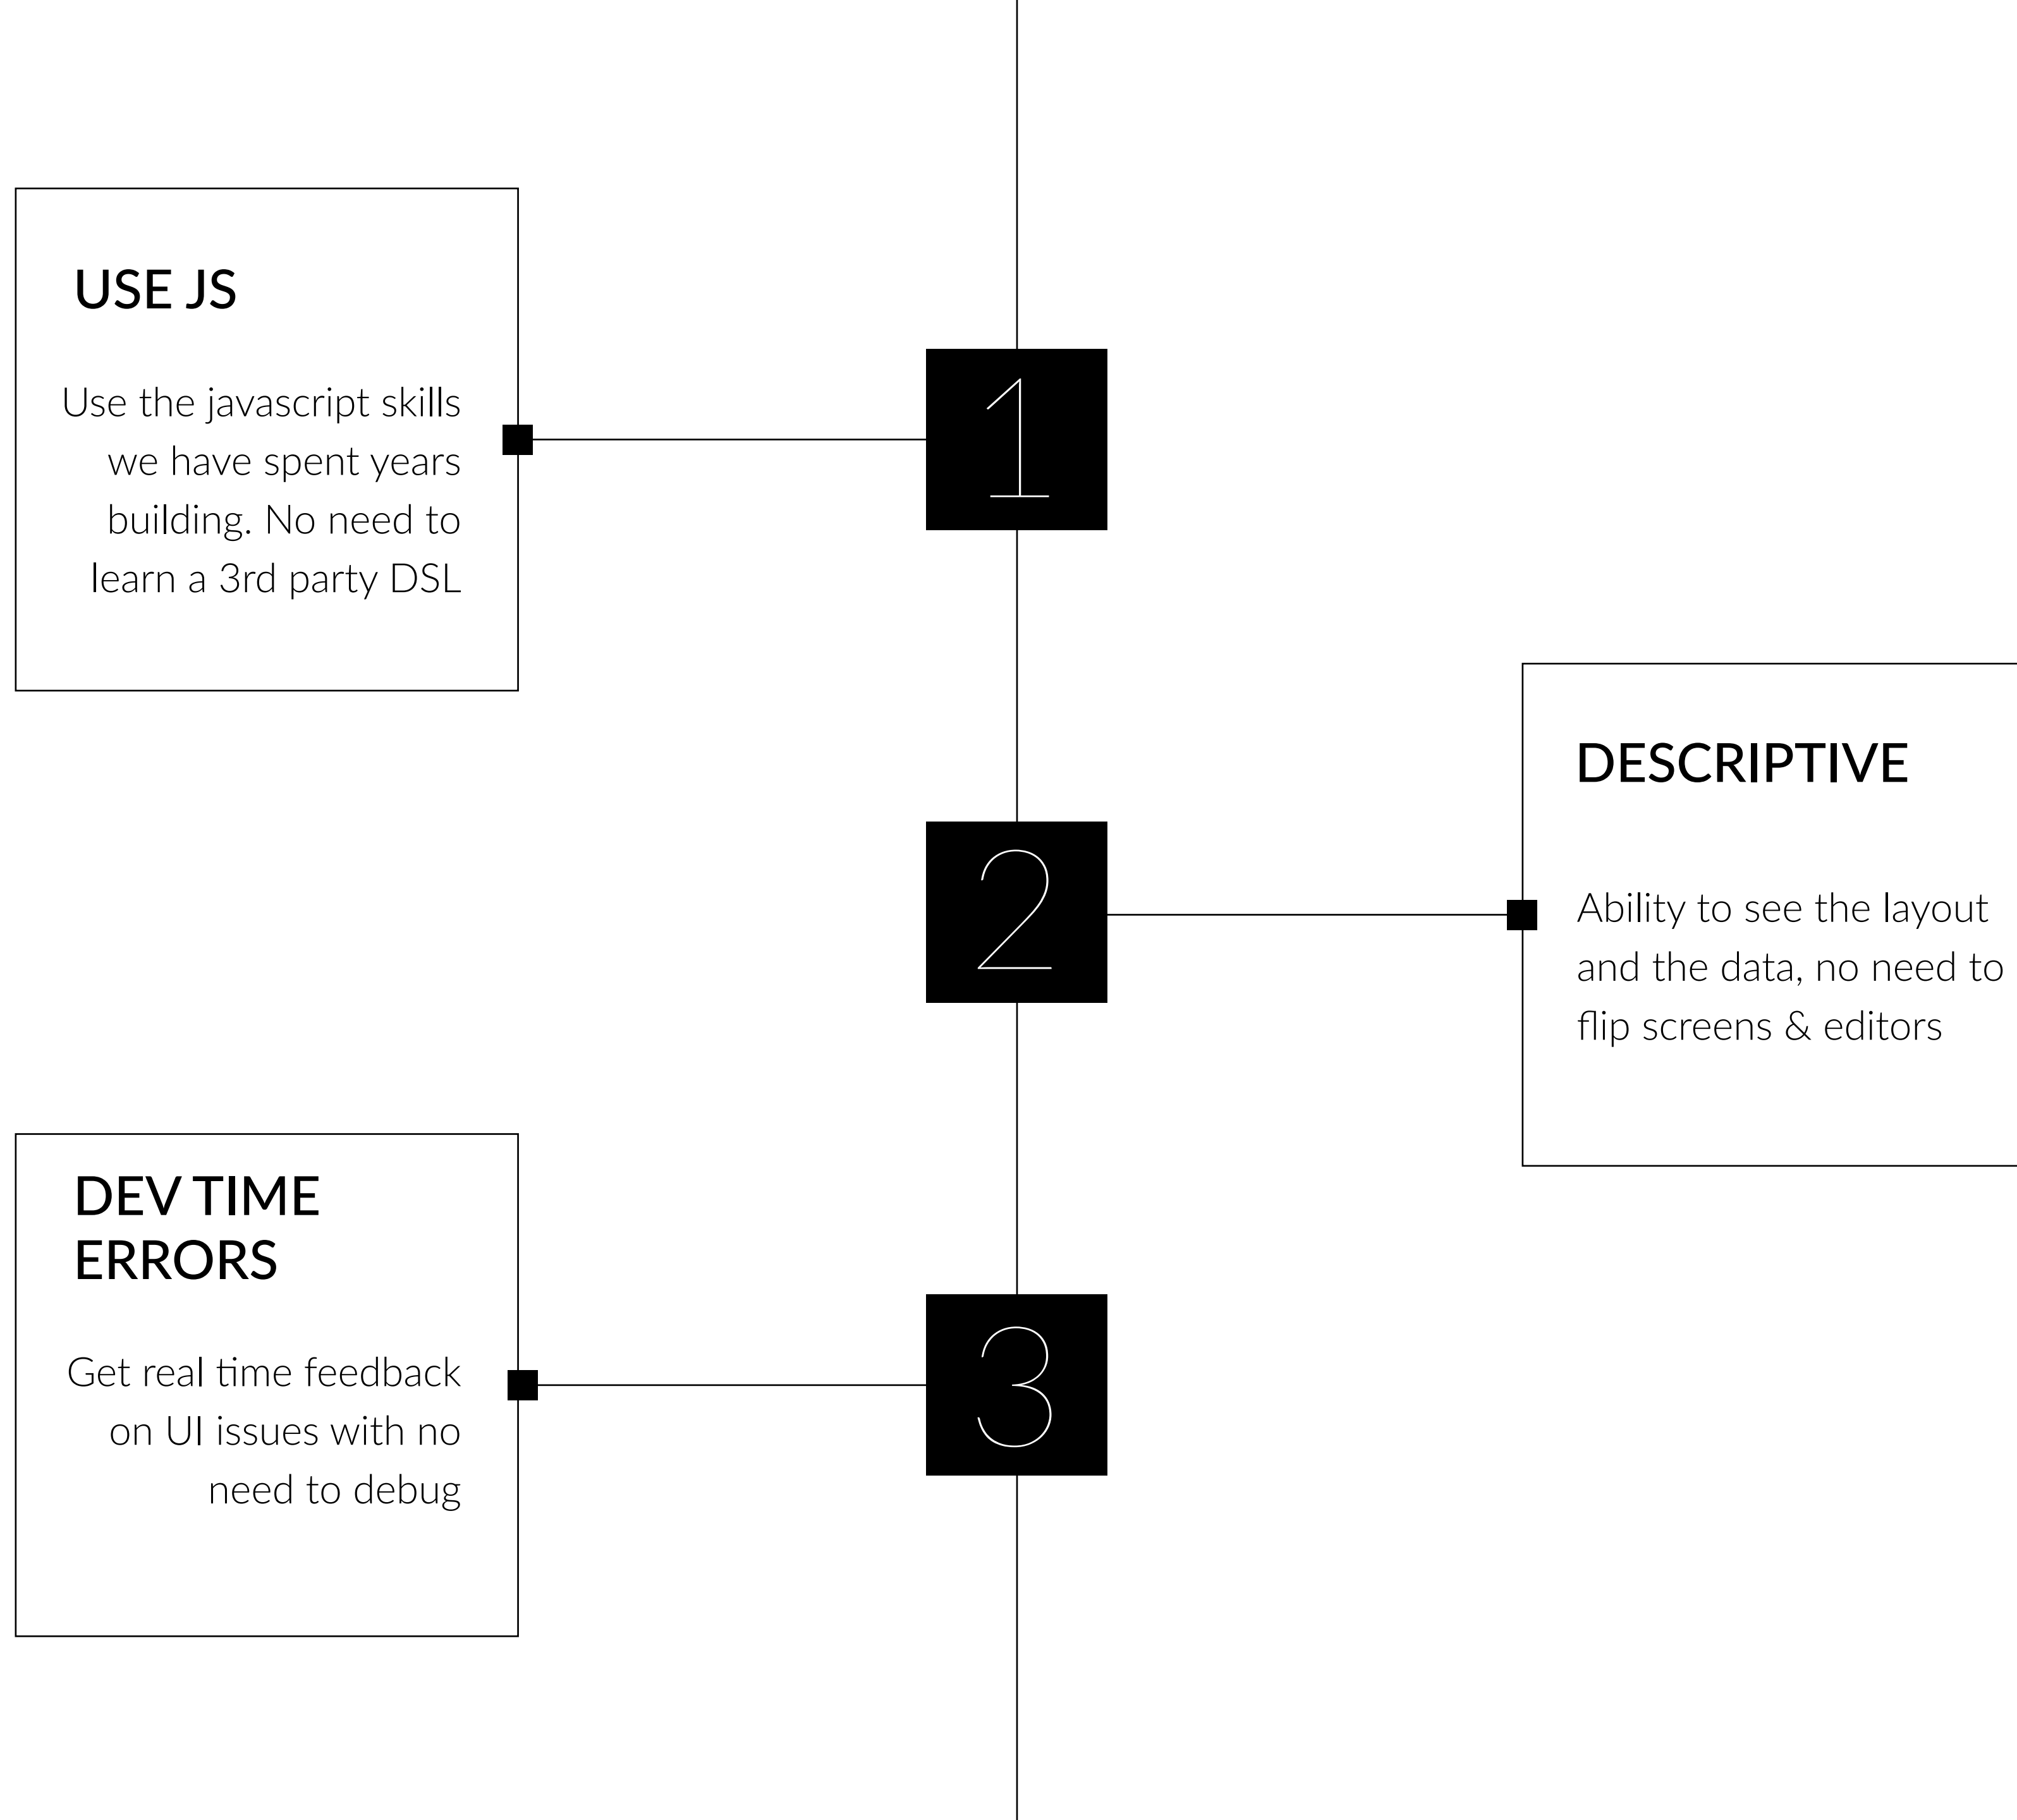

```
<View style={styles.container}>
  <Text style={styles.welcome}>
    Welcome to React Native!
  </Text>
  <Text style={styles.instructions}>
    {this.renderGetStartedText()}
  </Text>
  <Text style={styles.instructions}>
    Press Cmd+R to reload,{'\n'}
    Cmd+D or shake for dev menu
  </Text>
</View>
```

JSX

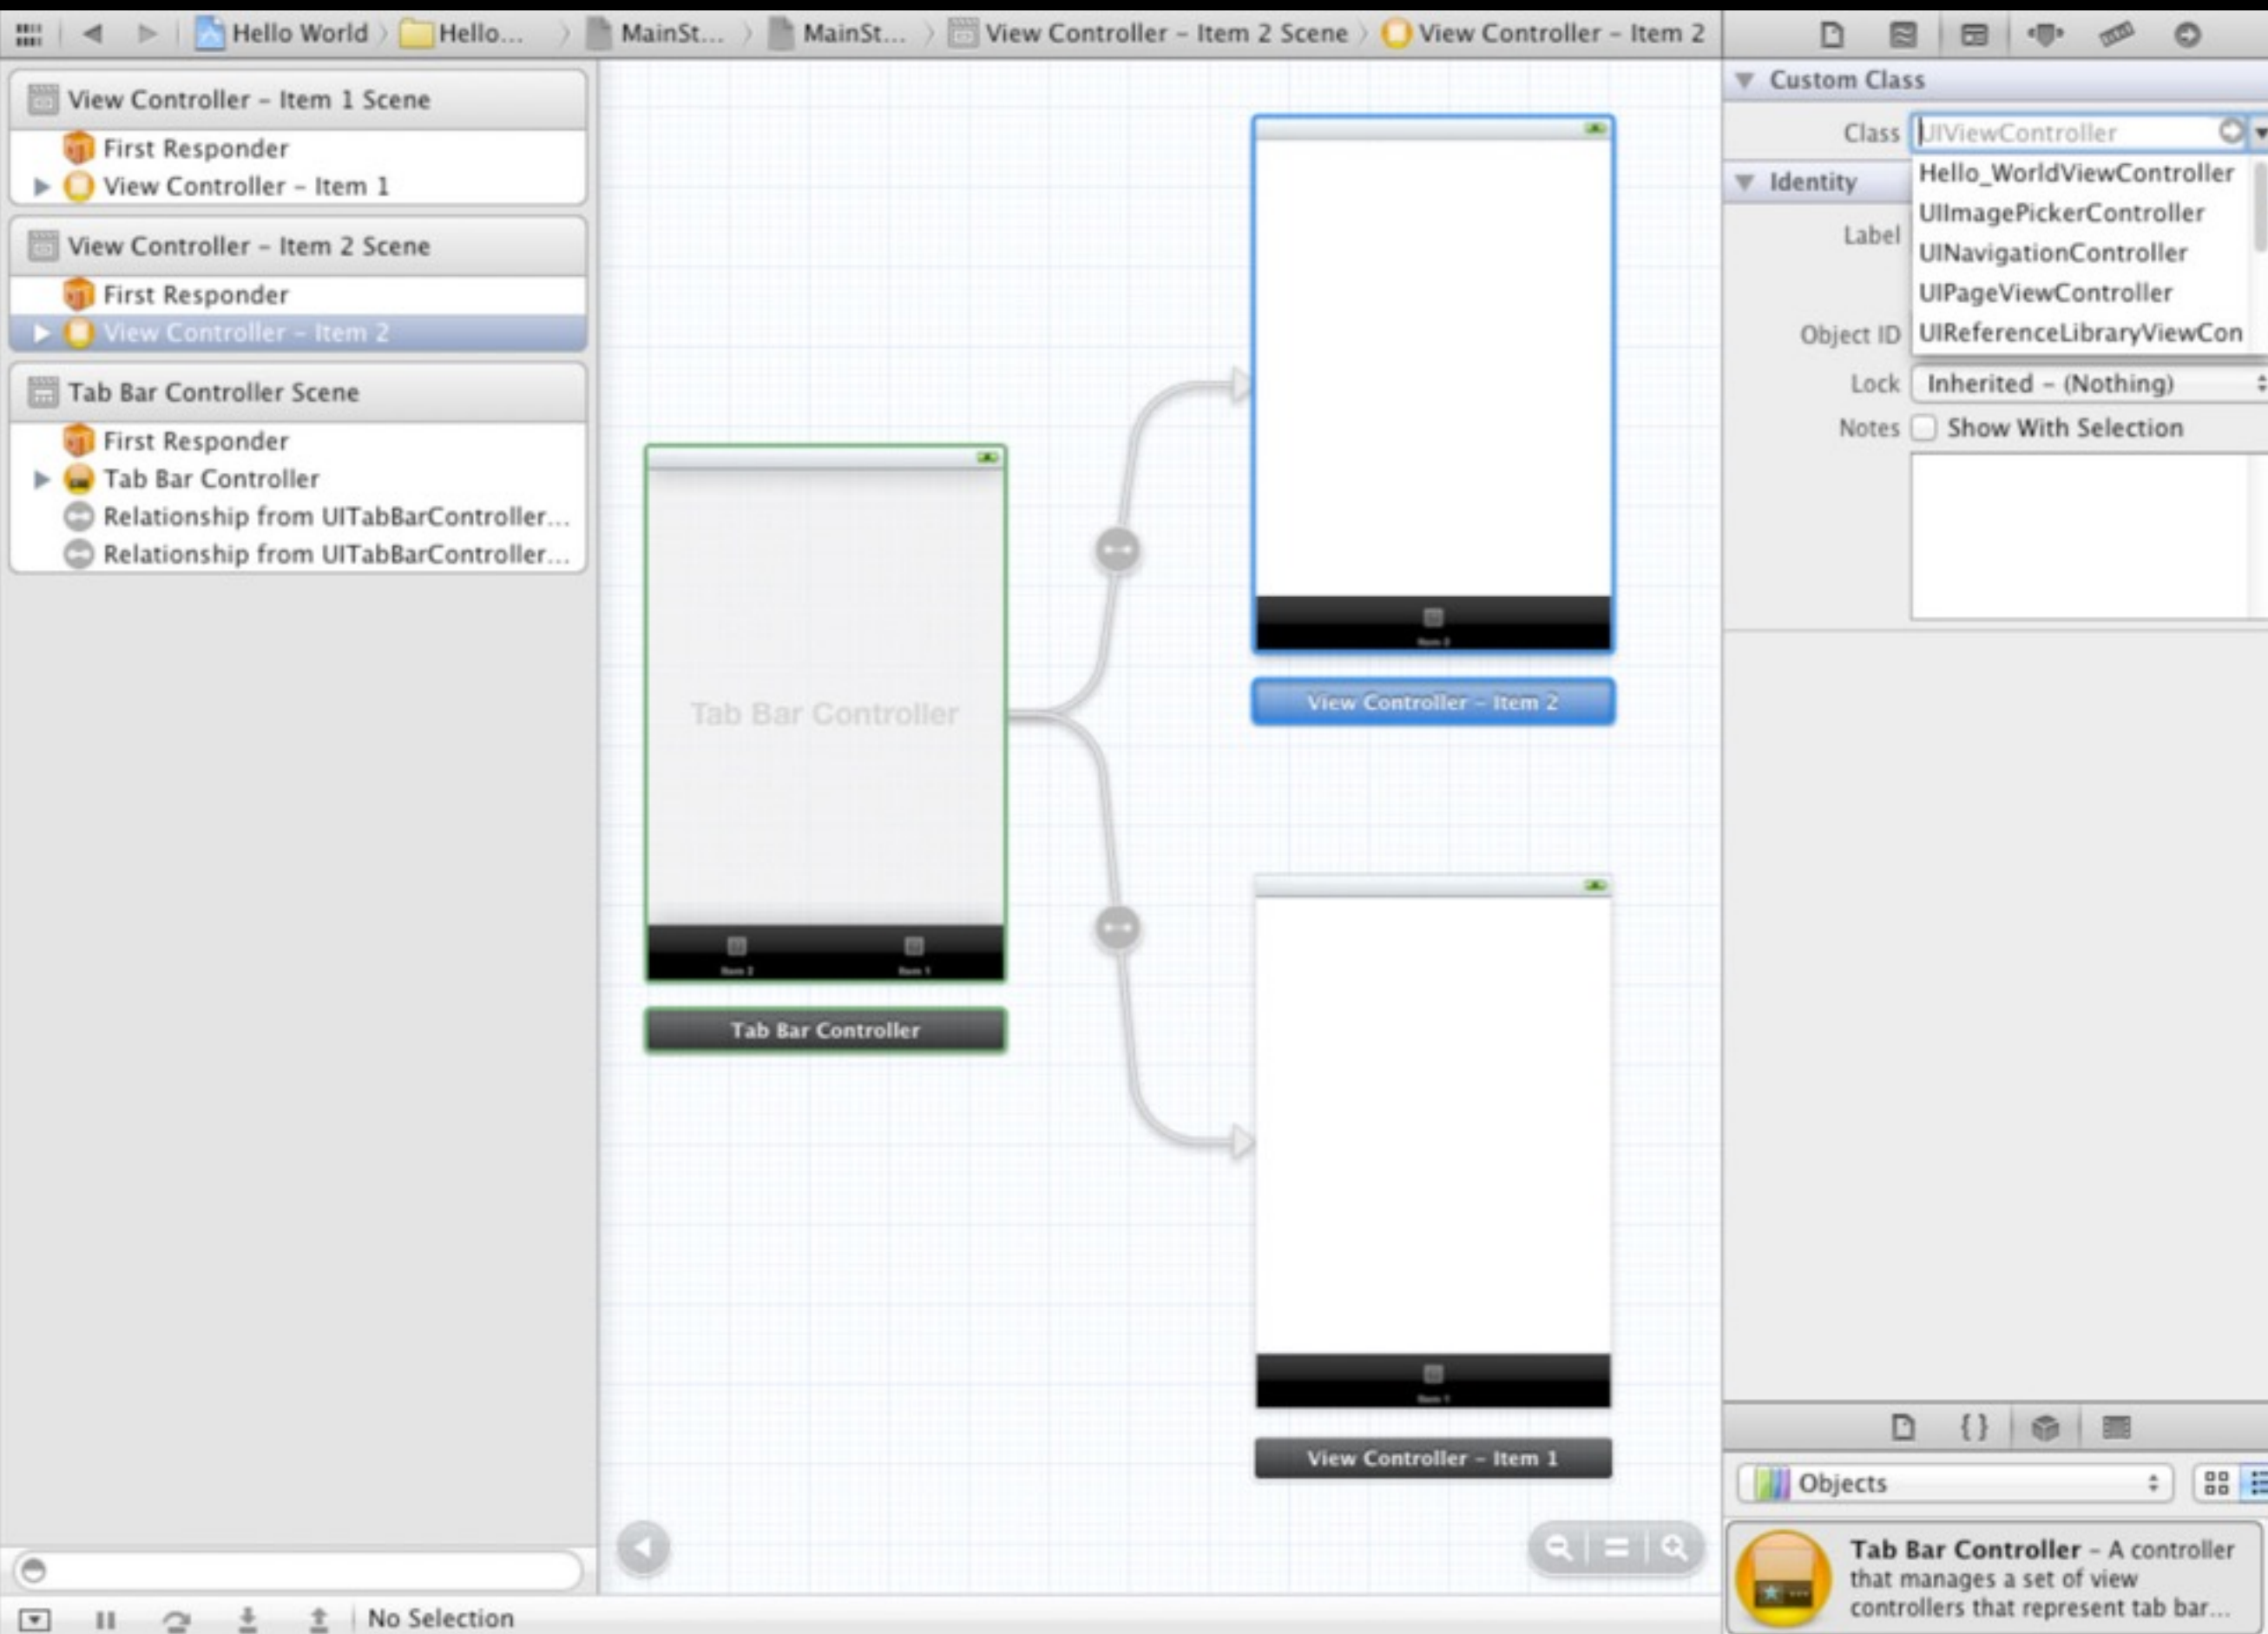

IT'LL BE ALRIGHT

INTERFACE BUILDERS

- Hard To Debug
- Works Horribly with Source Control
- Can duplicate code

I HAVE AN APPOINTMENT TO SEE A DEMO OF YOUR NEW PRODUCT.

www.dilbert.com scottadams@aol.com

AND THE UNIT WILL BE IN A CASE LIKE THIS, BUT COMPLETELY DIFFERENT, AND IT WILL HAVE SOFTWARE, ONCE WE WRITE IT.

2/25/03 © 2003 United Feature Syndicate, Inc.

YOU LET ME TRAVEL FOUR HOURS TO SEE AN EMPTY CASE?

ARE YOU FORGETTING THE BLANK CD?

HOT MODULE ■ REPLACEMENT

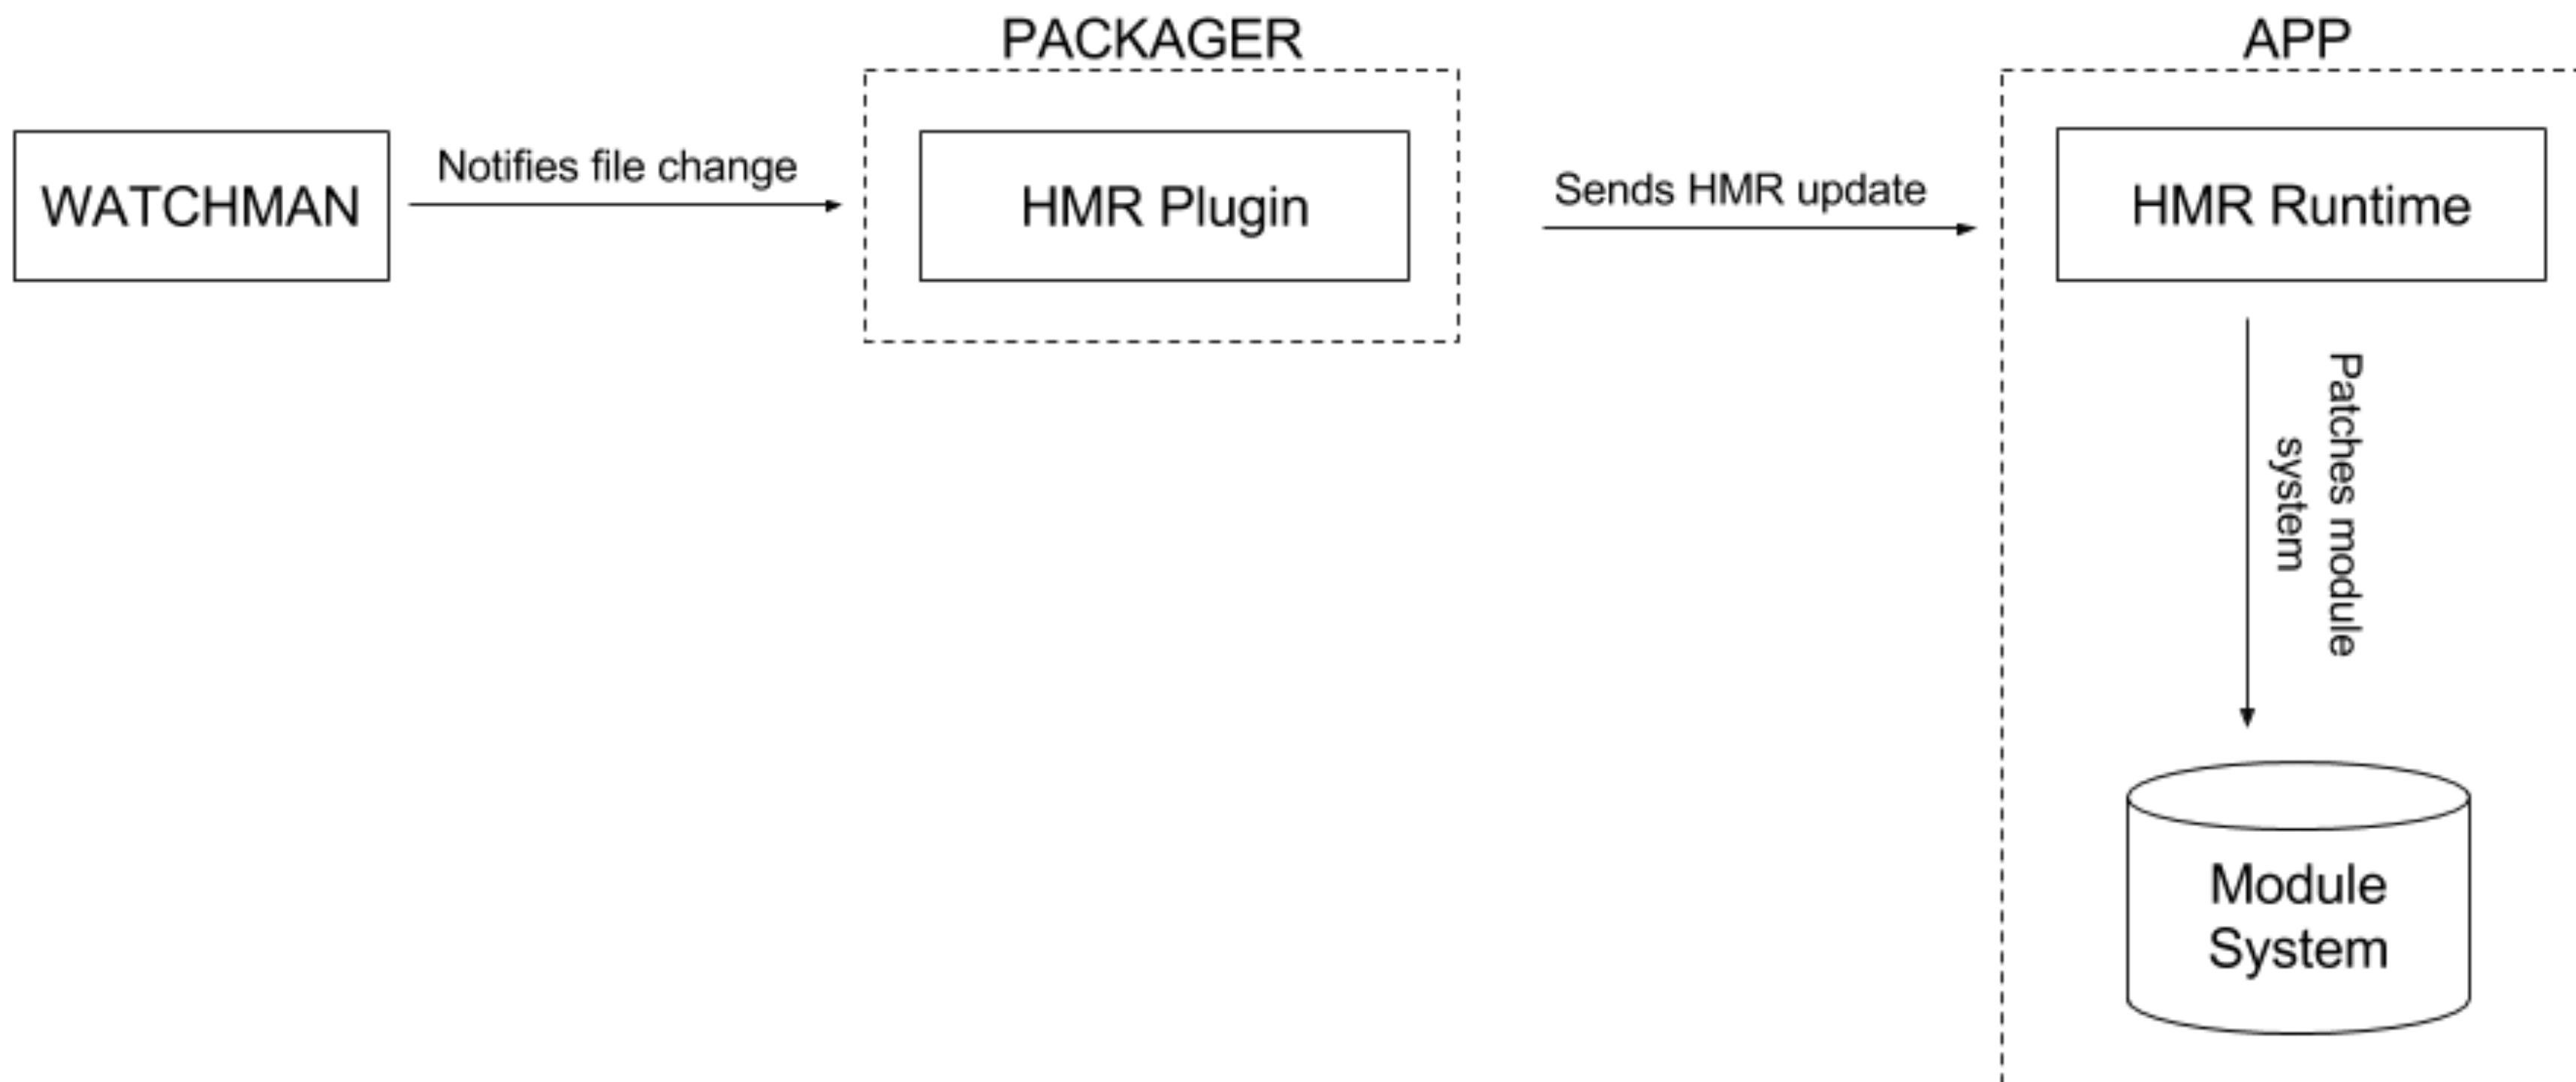

(HMR) is a feature to inject updated modules
into the active runtime.

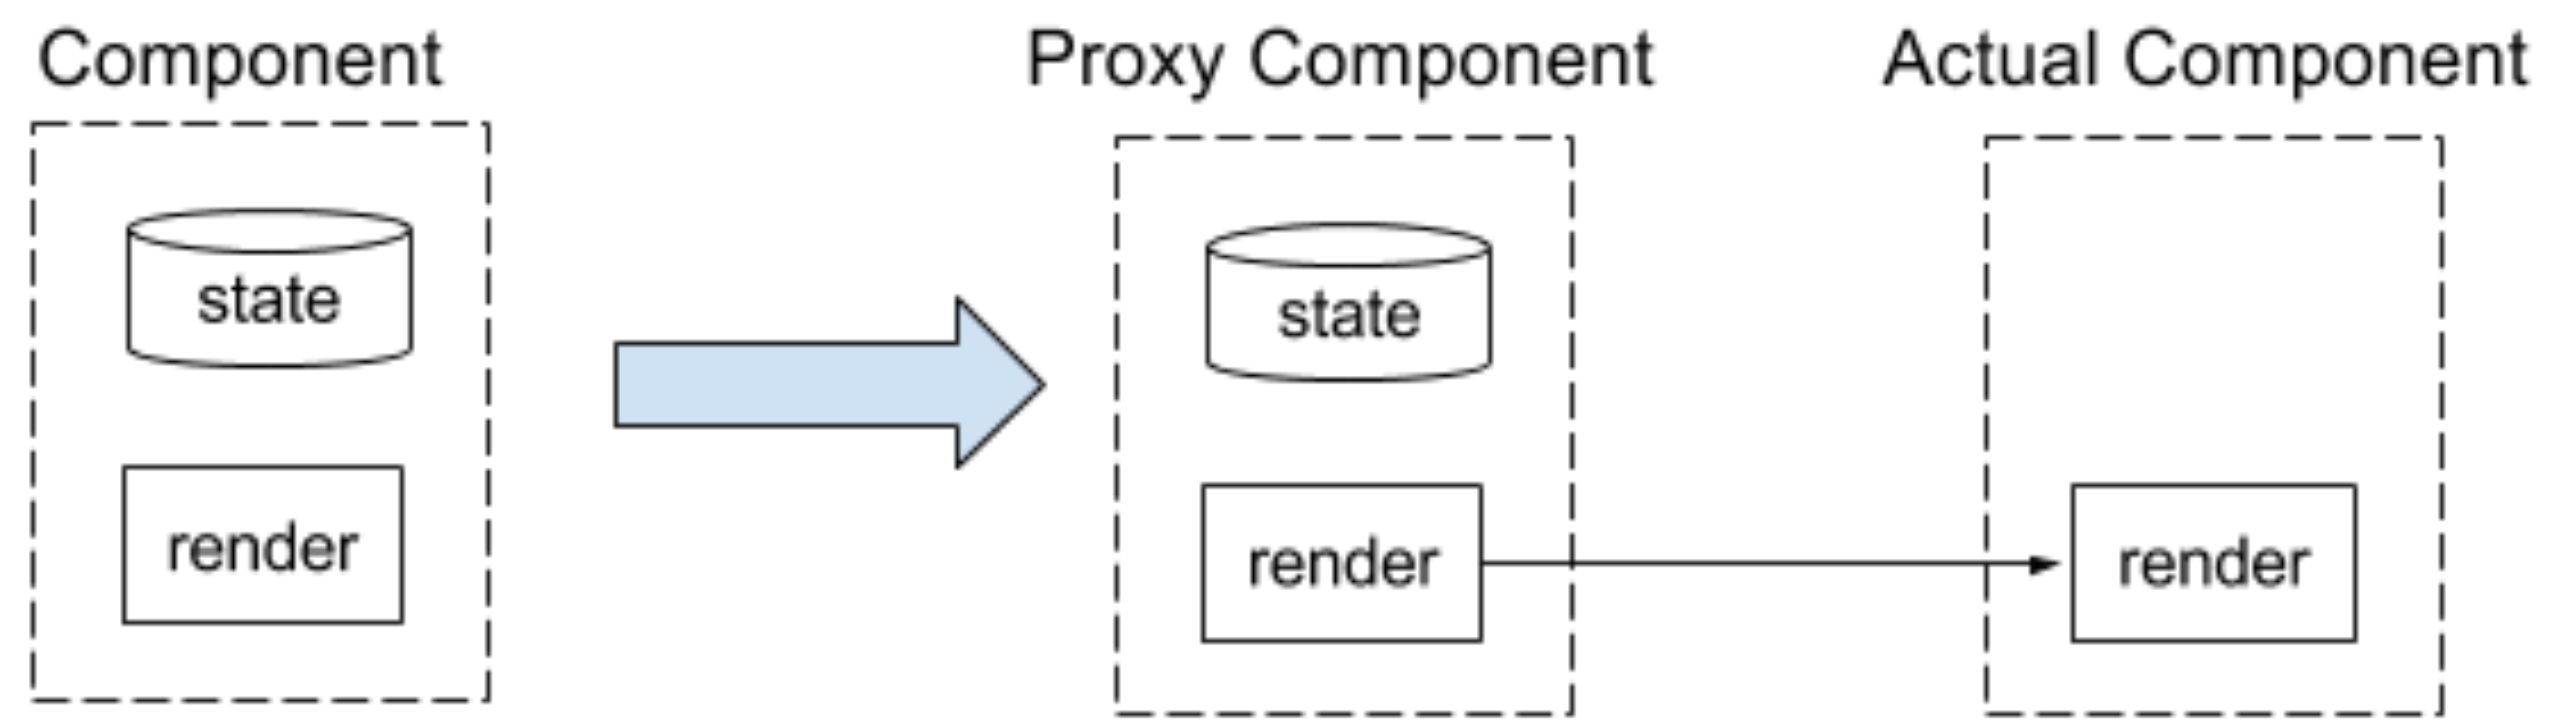

IT'S LIKE LIVERELOAD FOR EVERY MODULE.

HMR &
HAPPINESS

DEMO GODS

**PLEASE LET THIS DEMO
WORK**

3

MENTAL CLARITY

For me the greatest beauty
always lies in the greatest
clarity

- Gotthold Lessing -

WRITE CLEAR CODE, NOT CLEVER CODE

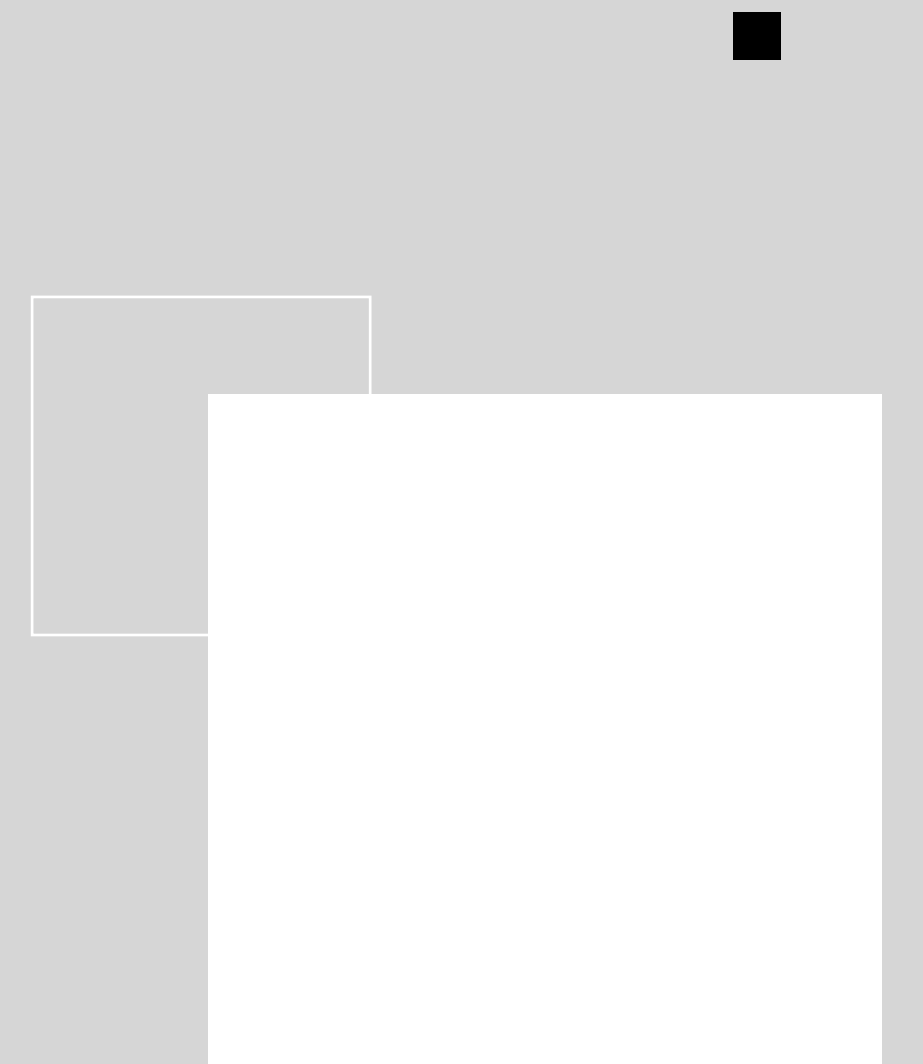

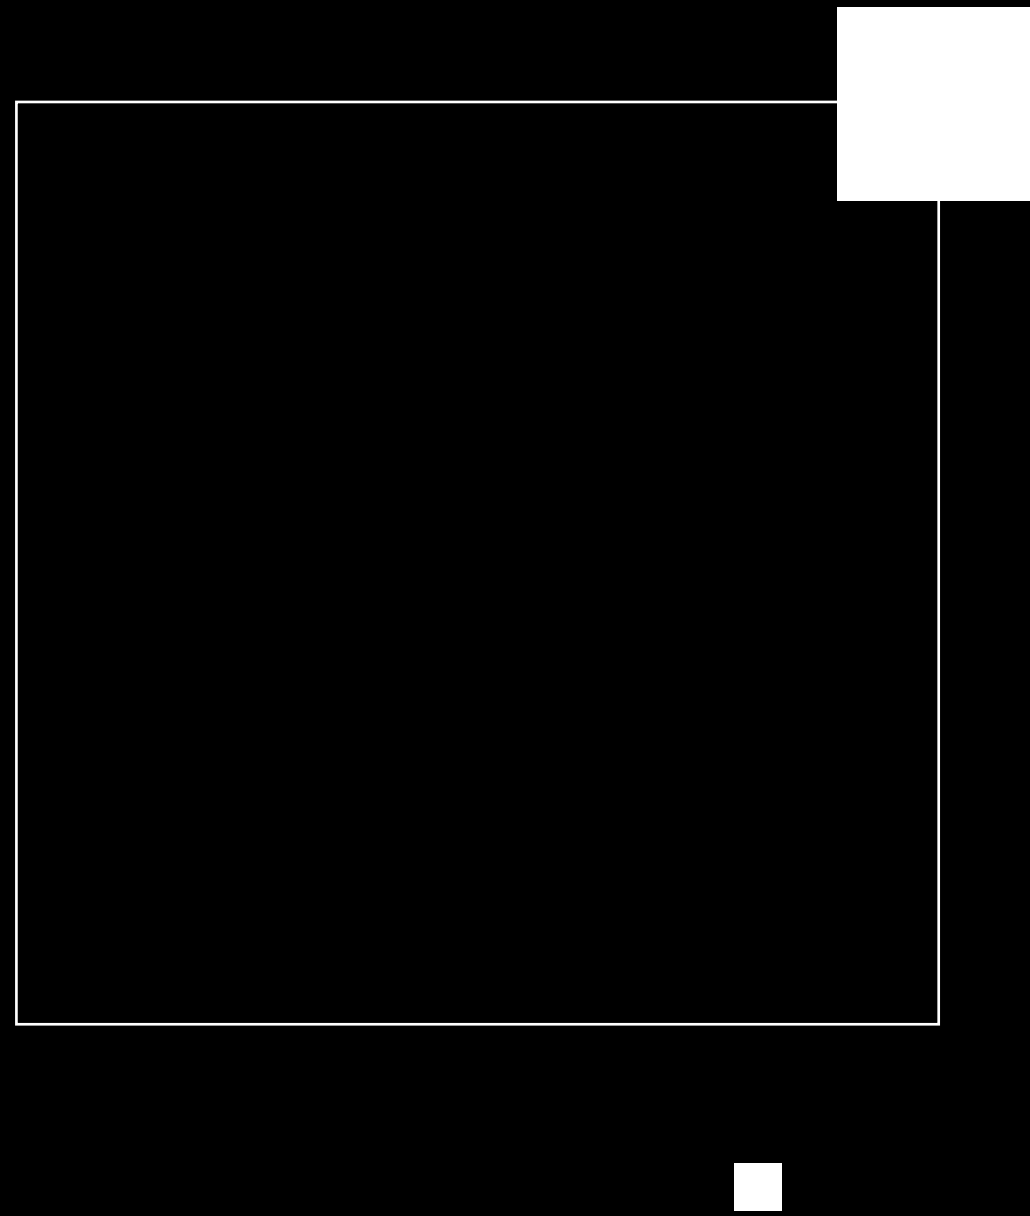

```
candidateNum=4
if candidateNum == "4":
    handleCandidate4()
    return true
else:
    handleCandidate3()
    return true
```

Always code as if the guy who
ends up maintaining your code
will be a violent psychopath
who knows where you live

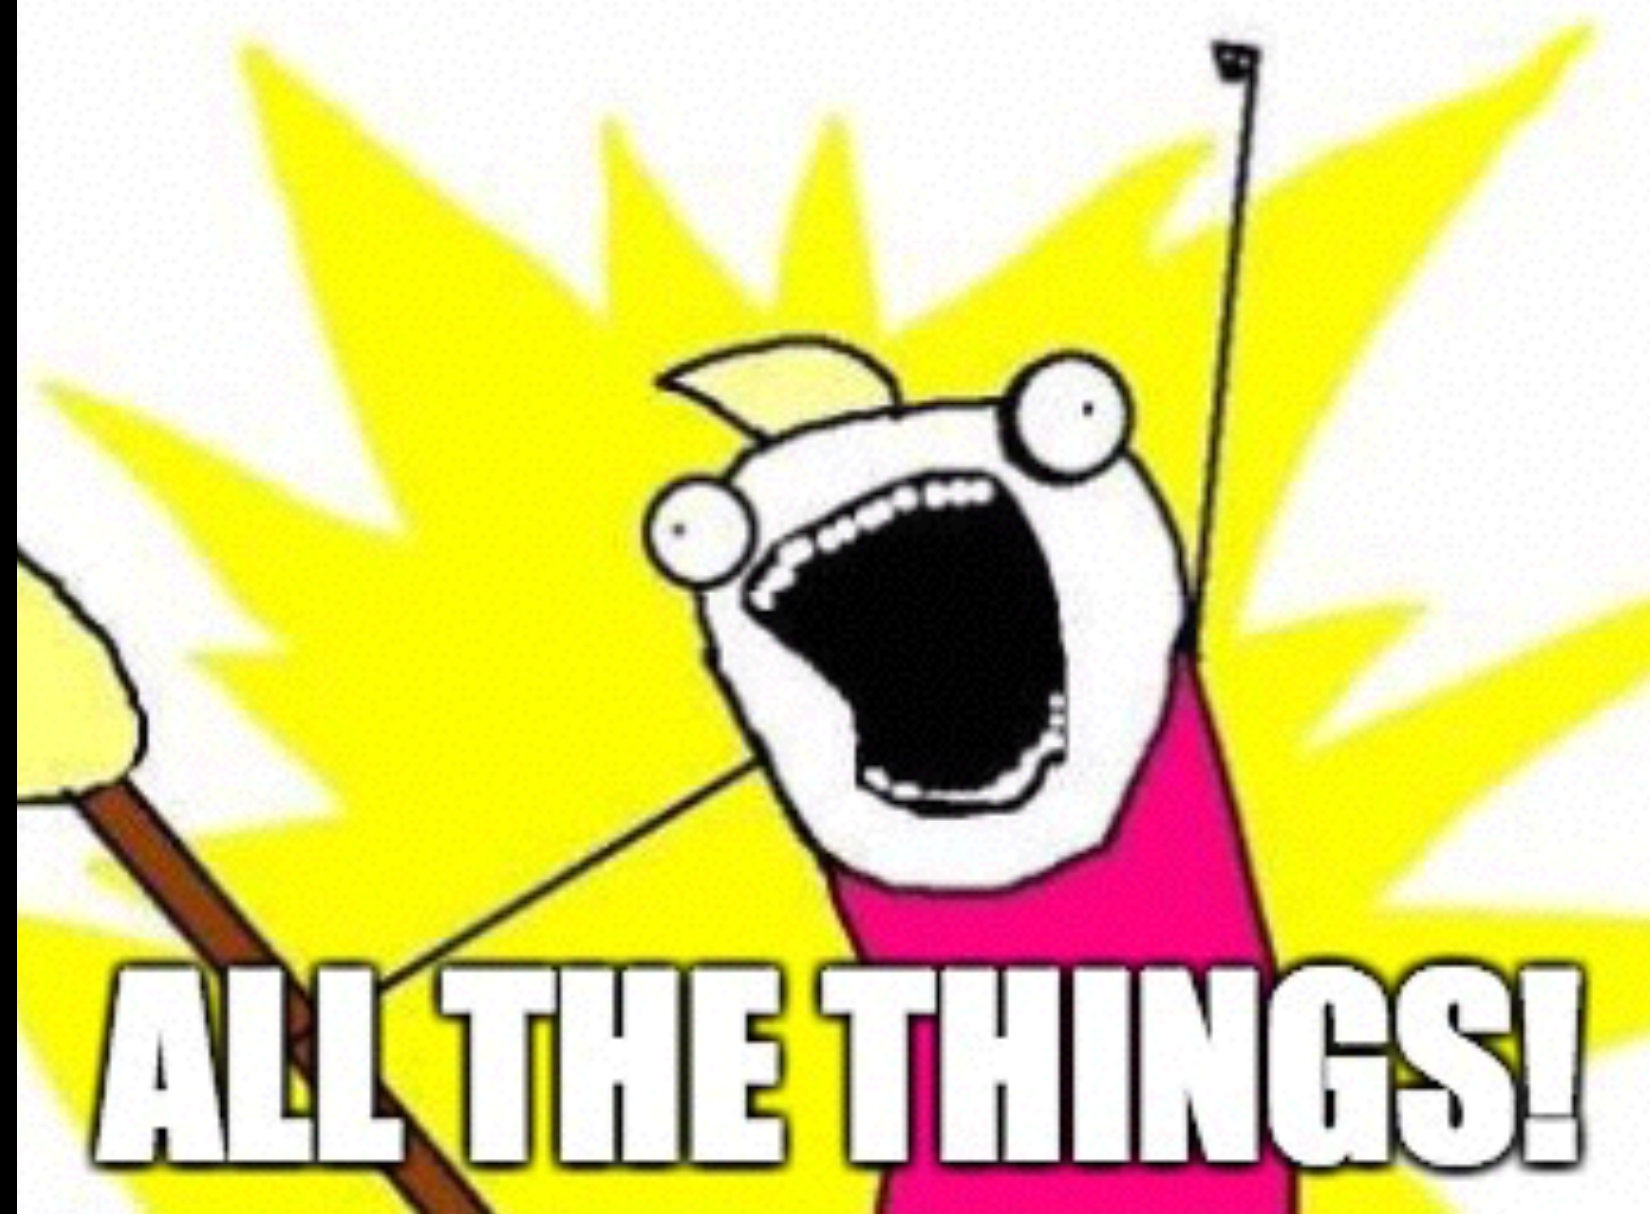

- Martin Golding -

START SIMPLE & ADD COMPLEXITY AS NEEDED

- Start with pure, stateless functions
- Start with small components and combine
- Unidirectional Data Flow

COMPOSE

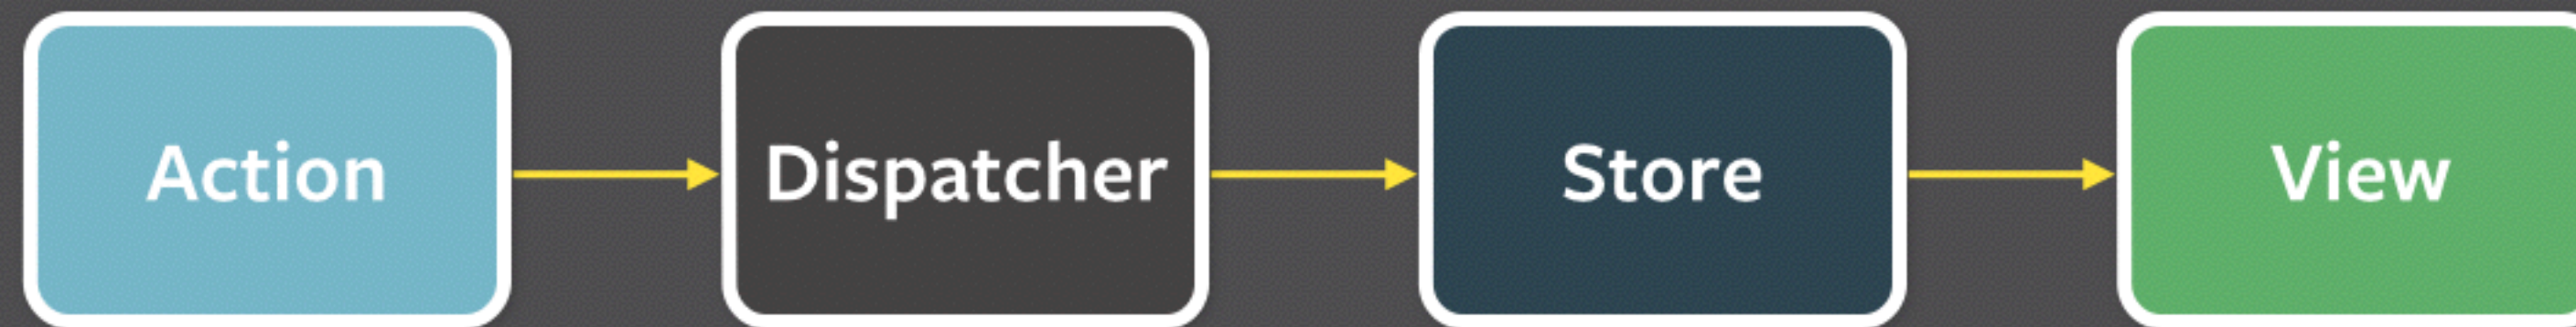

ALL THE THINGS!

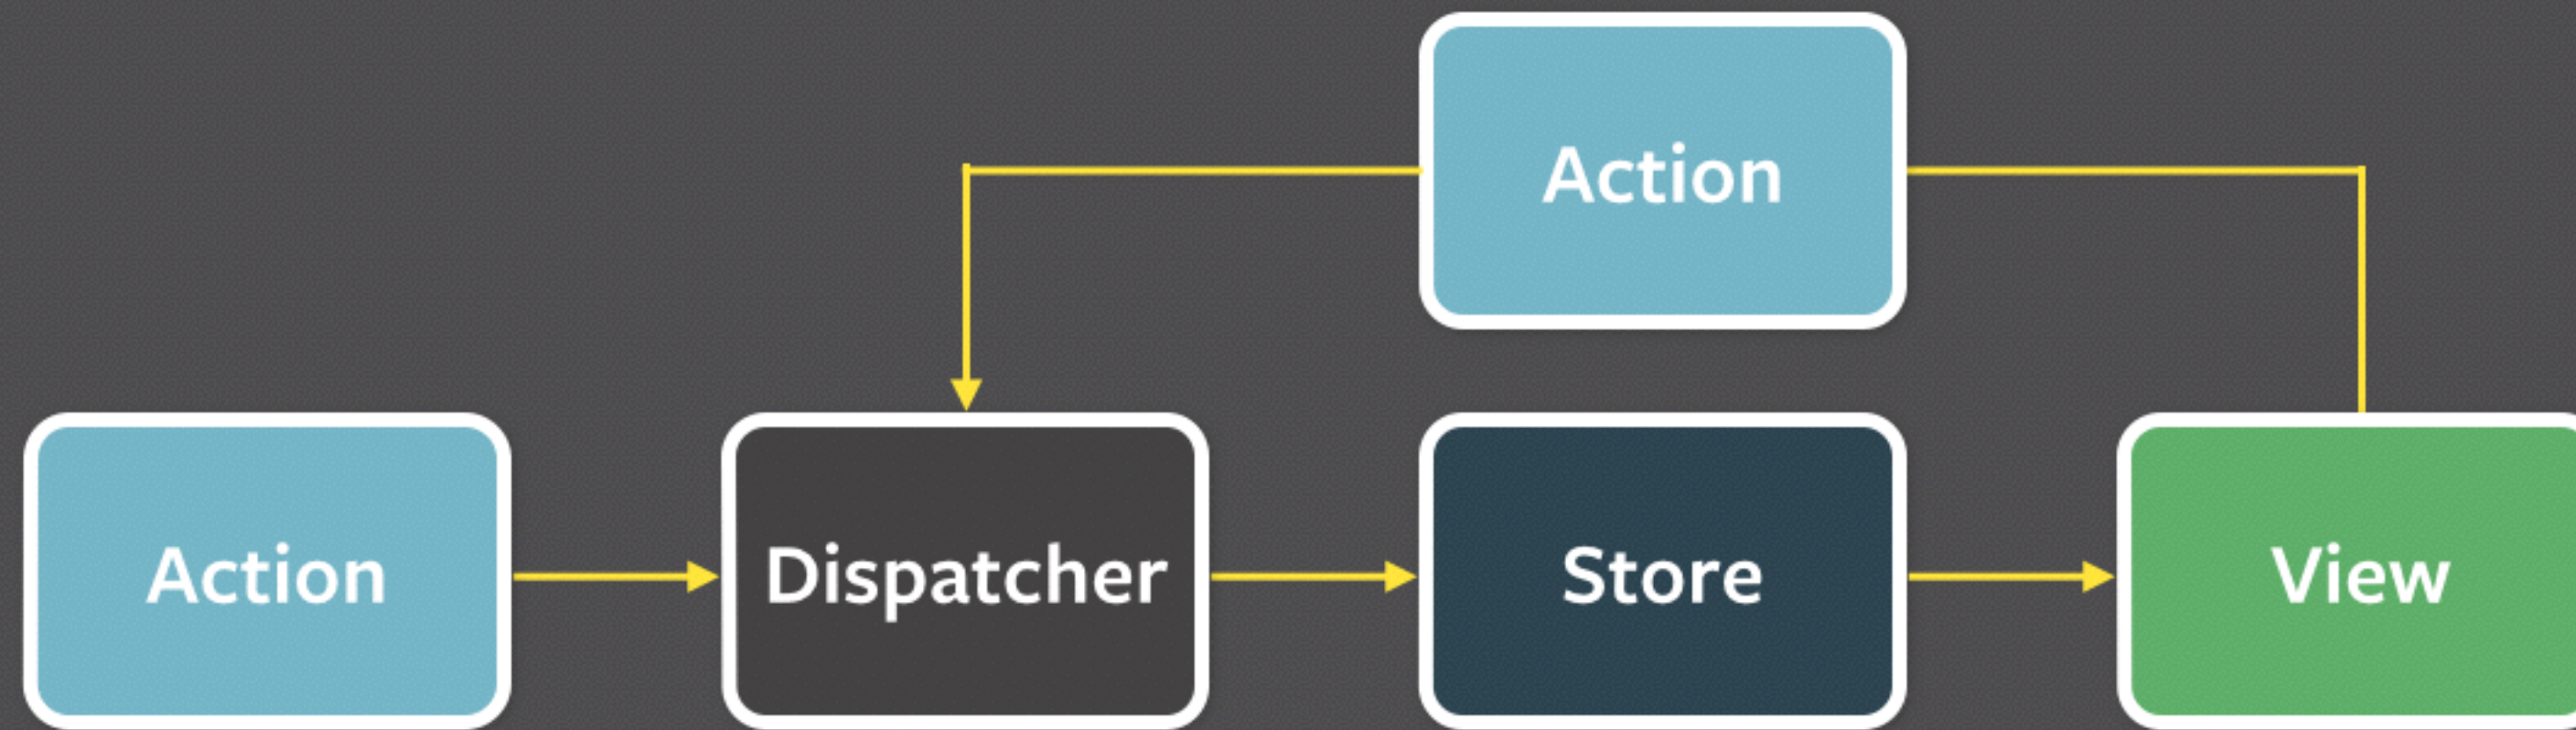

UNIDIRECTIONAL DATA FLOW

This means that all data in an application follows the same lifecycle pattern, making the logic of your app more predictable and easier to understand. It also encourages data normalization, so that you don't end up with multiple, independent copies of the same data that are unaware of one another.

DEMO TIME

**LET'S HOPE THE DEMO-GODS ARE
SMILING!**

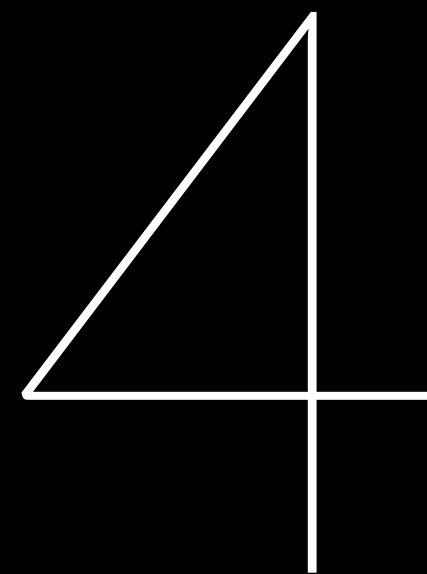

memegenerator.net

Redux

RF

CROSS PLATFORM

Our goal is not to build a platform; it's to be cross all of them.

- Mark Zuckerberg -

CROSS PLATFORM

WITH REACT NATIVE - YOU CAN

- Share UI and Code
- Splinter out React Native Code As Needed
- Go To Swift, Obj-C, Java as well (Native Modules)

STYLING

STYLING IS STILL A WORK IN PROGRESS

- Flexbox
 - Defaults can be non-intuitive
 - Difficult at times to learn
- StyleSheet
 - Styles are objects, which is a blessing and a curse
 - Unified shared styles like CSS require 3rd party

DEVICE SUPPORT

- Official Support is limited (but growing)
 - Network
 - Location
 - Clipboard
 - Camera Roll
 - App Links
 - Accessibility
 - Vibration
 - Push Notifications (iOS ONLY)
- Missing (npm)
 - Audio
 - Video
 - Microphone
 - Bluetooth
 - Permissions
 - Push Notifications (Android)
 - Navigation (its in preview)

UPGRADE PROJECT

SUCKS

memegenerator.net

Back to happiness ...

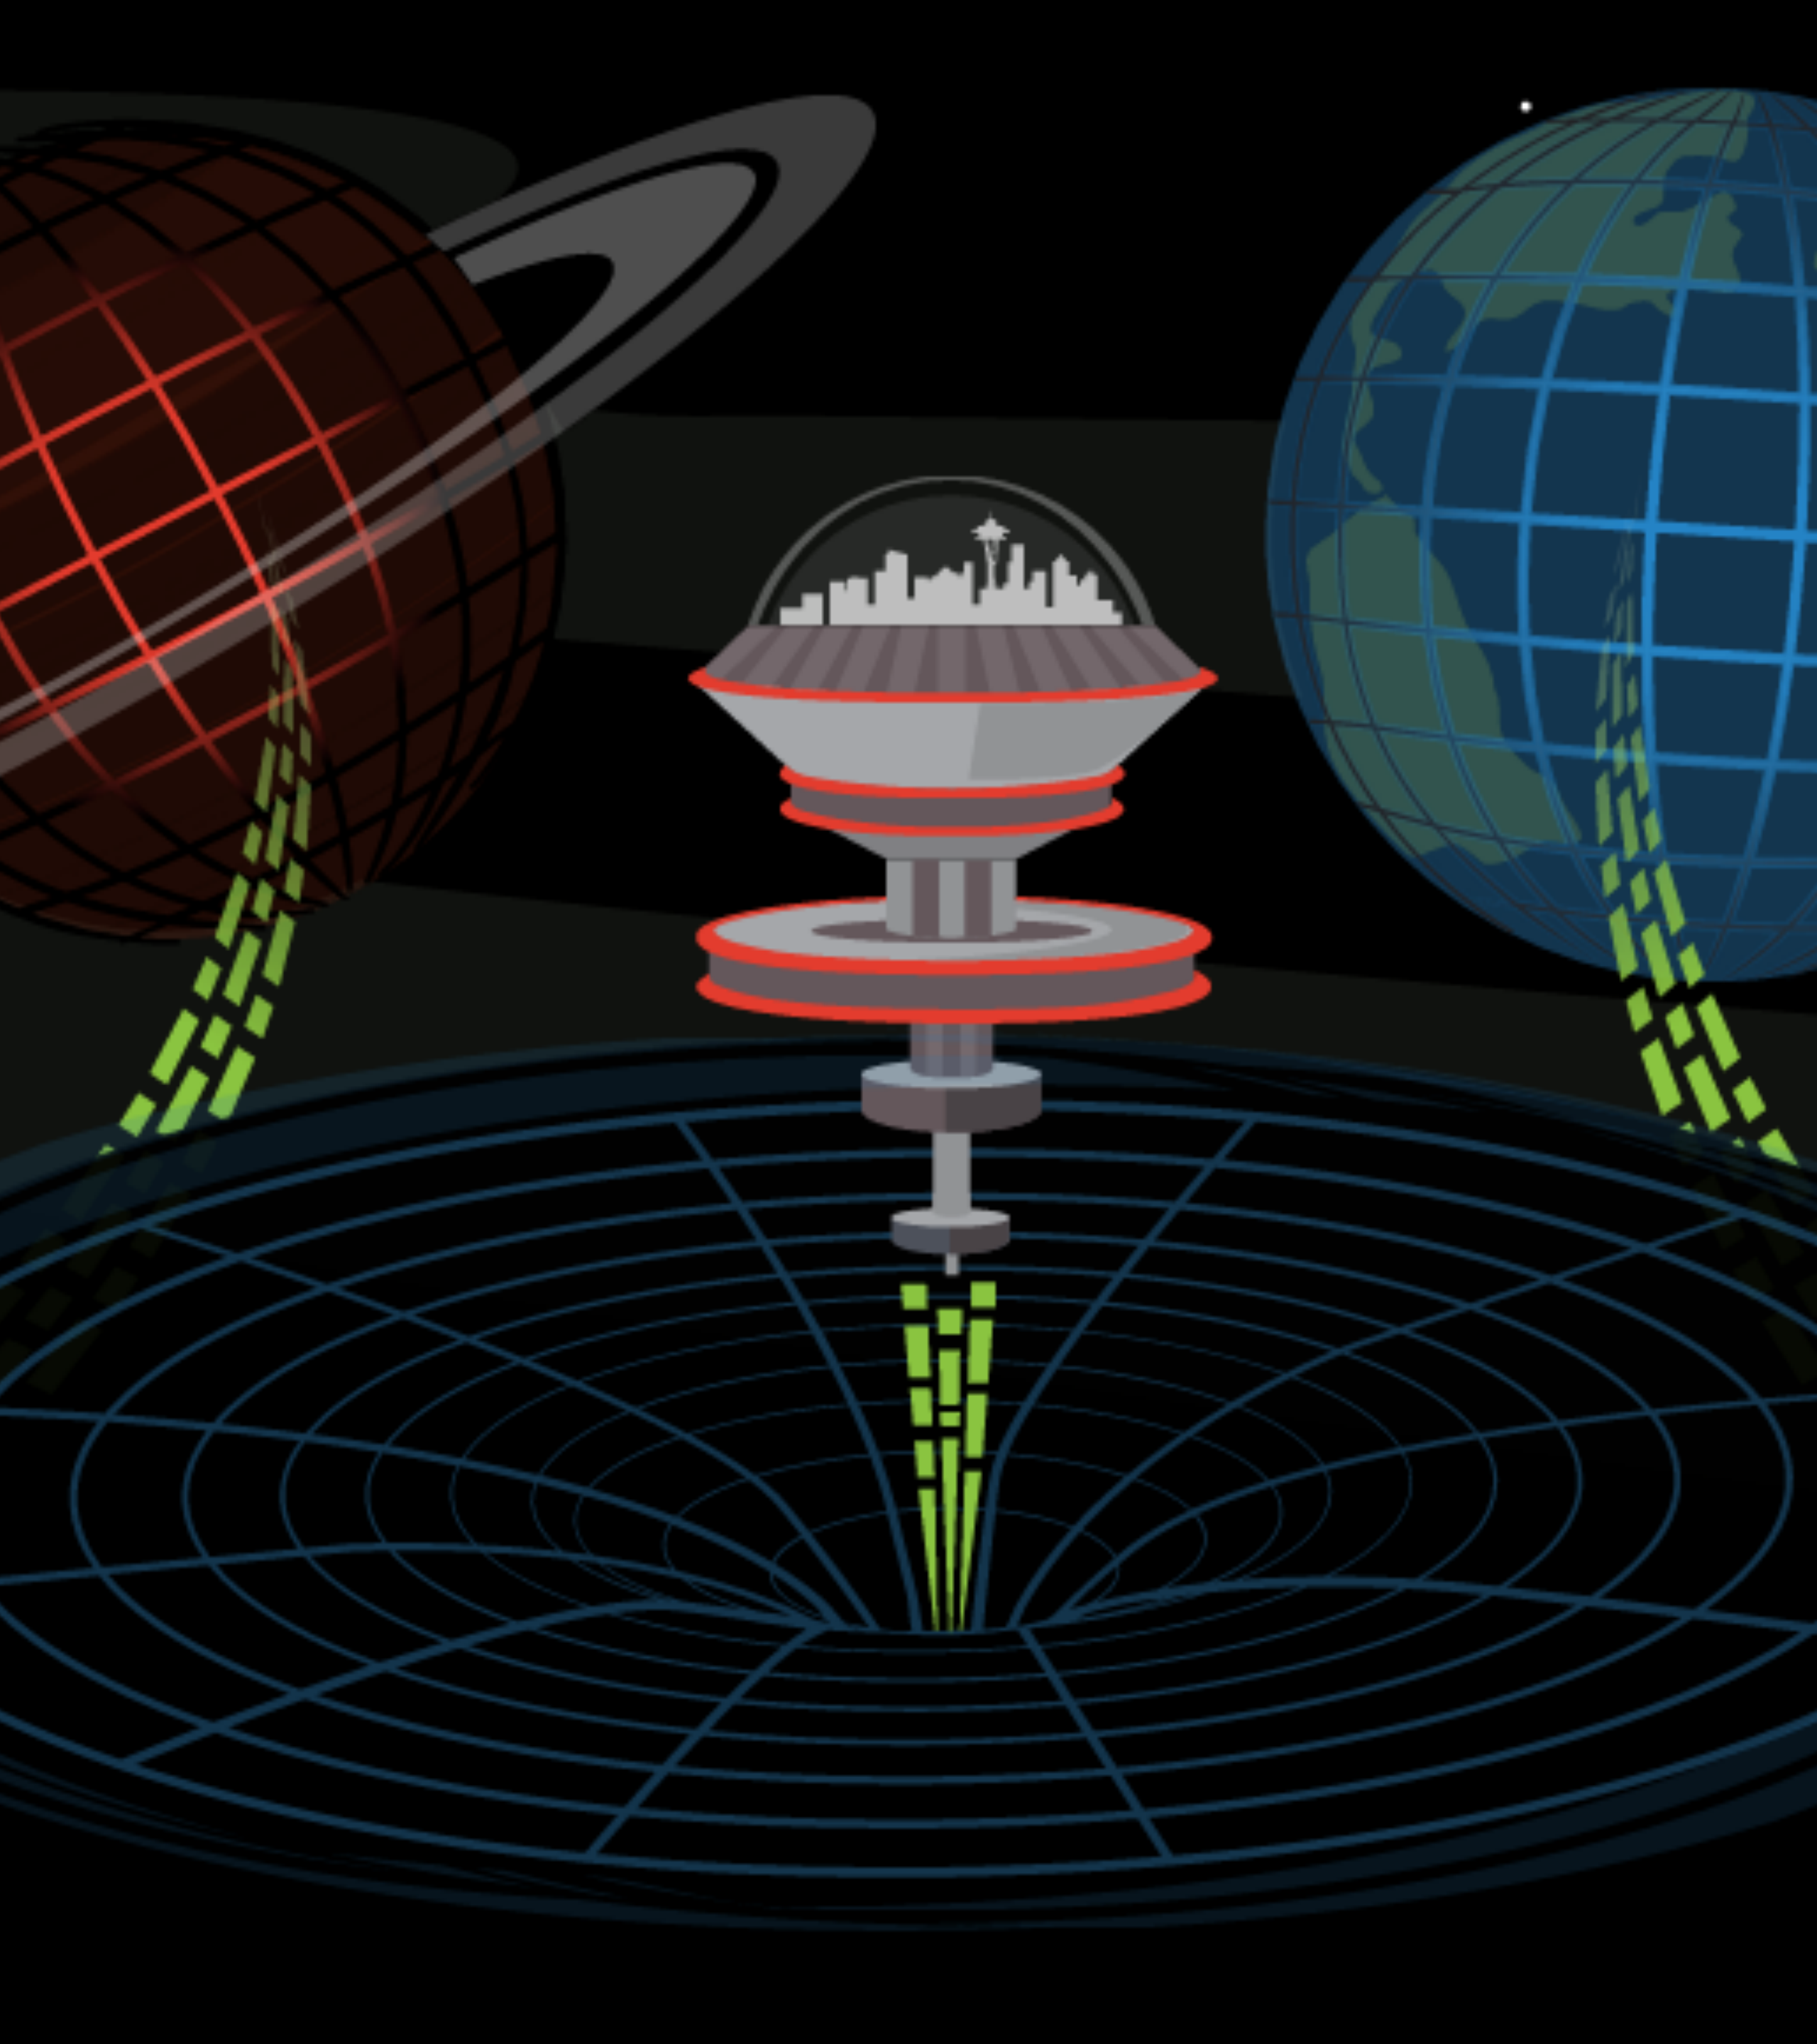

BUDDYBUILD

Build, deploy and gather feedback for your iOS and Android apps in one seamless, iterative system.

CODEPUSH

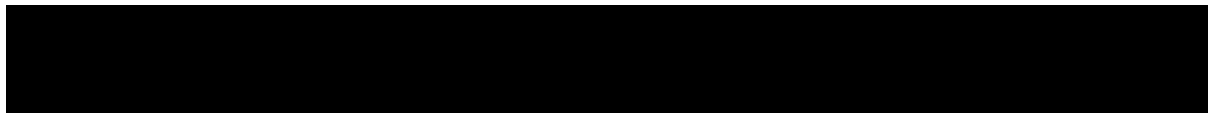

CodePush is a cloud service that enables React Native developers to deploy mobile app updates directly to their users' devices. It works by acting as a central repository that developers can publish certain updates to (e.g. JS, HTML, CSS and image changes), and that apps can query for updates from (using our provided client SDKs).

PEPPERONI

Pepperoni is a blueprint for building cross-platform mobile experiences rapidly with ready-to-use integrated building blocks for common mobile app features.
